

Is andata.ru legit? TrustSniffer's high-trust assessment: 100/100

andata.ru

Verdict

100

OUT OF 100

HIGH TRUST

andata.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate website for Andata — an AI-driven marketing analytics and automation SaaS. Describes features (analytics, AI agents, integrations, optimization, personalization), pricing tiers, 14-day free trial, case studies, and contact/legal information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Andata is a corporate website for an AI-driven marketing analytics and automation SaaS platform. It presents AI agents, cross-channel analytics, campaign optimization, personalization, integrations, case studies, tiered pricing, enterprise implementation, and a 14-day free-access offer, indicating a subscription software and professional-services business model.

Scam/Impersonation Risk

No contradictions were observed. The site’s content is internally consistent with a corporate SaaS offering, and the available checks found no phishing, brand-impersonation, malicious-content, or suspicious-behavior indicators. The presence of a conventional login and sign-up flow is consistent with the stated service model; observed interaction testing found no hidden forms, wallet activity, clipboard manipulation, cloaking, or non-whitelisted external submissions. External reputation coverage was clean, although that supports the risk assessment rather than independently proving the operator’s identity.

EVIDENCE

- The homepage and product navigation describe marketing analytics, AI agents, campaign optimization, integrations, personalization, and A/B testing as components of one SaaS platform.
- The site’s observed interaction behavior recorded no hidden forms, zero wallet-connect or wallet-drainer activity, zero clipboard writes, and zero suspicious inline scripts.
- External reputation checks for the domain recorded 0 malicious detections, 0 suspicious detections, and no confirmed phishing or impersonation result.
- The domain was registered in 2008 and is approximately 18.49 years old; archival records contain 206 snapshots spanning 2008–2025, with 18 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an established commercial software provider, but the real-world operator identity is not independently verified. The site provides corporate, contact, pricing, and legal-oriented content, yet the available disclosure state does not establish a verified legal entity or regulated status. No financial-services license is claimed or verified; for a marketing-technology SaaS provider this is a regulatory transparency point rather than evidence of deceptive activity. Any enterprise engagement should therefore distinguish the software supplier’s contractual, data-processing, and commercial responsibilities from regulated financial services.

EVIDENCE

- The pricing and product pages describe subscription tiers, enterprise plans, and implementation services rather than an investment, brokerage, or payment-services proposition.
- The about, contact, and legal-oriented site areas provide business information, but the supplied evidence does not independently verify the operating legal entity.
- The domain is registered through RU-CENTER-RU.
- The site is served from AS29226, MASTERTEL-AS – JSC Mastertel, RU; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-30.

What to Verify Next

Before credential or payment interactions, an enterprise customer should independently confirm the contracting entity named in the commercial agreement, review the applicable terms, privacy and data-processing provisions, and confirm that invoices and payment instructions correspond to that entity. The stated trial, subscription, implementation, cancellation, and refund arrangements should be checked against the pricing and contractual materials. Where a deployment involves regulated data or sector-specific obligations, the customer should confirm the provider's relevant compliance responsibilities and validate official support channels through an independent route.

EVIDENCE

- The pricing area provides the commercial entry point for subscription and trial arrangements.
- The contact and legal-oriented pages provide the channels and documents to reconcile against the proposed contract.
- The login and sign-up areas represent the principal credential-interaction points requiring ordinary account-security and merchant-identity checks.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website. The overall posture is high trust and low risk for its stated SaaS purpose, while the operator's real-world identity remains not independently verified.

Infrastructure Integrity

The site uses Cloudflare CDN and WAF protection, which mitigates direct exposure of the service infrastructure and provides a meaningful defensive control. Observed infrastructure also includes CDN edge servers and potential origin candidates; protective infrastructure is a mitigating signal, not proof of legitimacy.

Closing Assessment

Normal business evaluation is proportionate, provided that ordinary independent checks of the contracting party, commercial terms, data obligations, and payment protections are completed before credentials or payments are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of andata.ru.

- The request stayed on andata.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-02-16. NOTED
- The earliest public archive of this site is from 2008-12-29. CLEAR
- It is hosted on MASTERTEL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about andata.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
