

Is andbeyond.media legit? TrustSniffer's high-trust assessment: 100/100

andbeyond.media

Verdict

100

OUT OF 100

HIGH TRUST

andbeyond.media appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 65%.

What this site appears to be

Corporate homepage for AndBeyond.Media, an advertising-technology company offering publisher monetization, programmatic SSP, header bidding, analytics, ad operations, and advertising formats. The page targets publishers and advertisers through consultation and signup calls to action and includes testimonials, locations, social links, policies, and a newsletter subscription.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

AndBeyond.Media is a corporate advertising-technology website that presents publisher monetization and advertiser-access services, including programmatic supply-side infrastructure, header bidding, Google Ad Manager optimization, analytics, managed ad operations, and multiple advertising formats. Its apparent business model is to earn service fees or a share of advertising revenue generated through publisher inventory.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or adverse threat-reputation signals were observed. The site presents a coherent B2B proposition supported by named testimonials, operating locations, policy links, established social profiles, and consistent publisher-focused calls to action. Its newsletter form does not request sensitive information or submit to an untrusted destination, while interactive testing identified no credential theft, cloaking, clipboard manipulation, or wallet-related behavior.

- The domain record shows registration through GoDaddy.com, LLC on 26 December 2014, making the domain approximately 11.61 years old.
- The web archive contains 250 snapshots from 7 February 2015 to 12 February 2026, spanning 12 tracked years; no suspicious repurposing or semantic category conflict was established.
- External reputation checks recorded zero malicious and zero suspicious detections, no search-browser threat finding, no reported infrastructure abuse, and an established global traffic rank of 7,511.
- The homepage contained no hidden forms or login form, and two successful behavioral runs found no cloaking, suspicious inline scripts, credential forwarding, or high-risk interaction pattern.

Regulatory Verification Notes

The website describes an advertising-technology and managed-monetization business rather than a regulated financial or brokerage service. It makes no surfaced claim of a financial-services license, and the supplied page evidence does not establish that such authorization is relevant to its stated activities. The homepage provides links to an About page, Contact page, Privacy Policy, Terms of Service, Ad Choices, and a takedown policy; however, the available evidence does not reproduce their legal-entity particulars, so contractual counterpart identification remains a standard procurement matter rather than a legitimacy concern. No matching broker-reputation record was identified, which has no evident bearing on this non-broker business model.

- The homepage identifies the business as a Google Certified Publishing Partner and directs prospective customers to consultation and service-onboarding pathways.

- The homepage navigation exposes corporate, contact, privacy, terms, advertising-choice, and takedown materials.
- The hosting infrastructure is served from AS14618 (AMAZON-AES — Amazon.com, Inc., US).
- The site uses a DV TLS certificate issued by Starfield Secure Certificate Authority – G2, valid until 21 September 2026.

What to Verify Next

Enterprise onboarding should confirm the contracting entity and applicable jurisdiction from the terms and corporate documentation, reconcile those details with invoices and payment instructions, and review the privacy and data-processing terms for publisher, advertising, and analytics data. Prospective commercial customers should also substantiate the claimed partner status and obtain written definitions for the homepage's performance indicators before relying on them in revenue forecasts.

- The homepage advertises “50% More Insights,” “30% Growth,” and a “70%” Health Score index without the supplied evidence providing calculation methods or contractual guarantees.
- The site offers a revenue calculator and “hidden revenue potential” messaging, making methodology, assumptions, and attribution terms relevant to commercial evaluation.
- The homepage provides Facebook, Instagram, and LinkedIn links that can support independent confirmation of official communications.
- The observed contact and newsletter pathways provide channels for requesting corporate, contractual, and data-governance documentation.

Summary Verdict

The site is legitimate, established, and trustworthy, with strong convergence among its long operating history, coherent corporate presentation, clean reputation, stable behavior, and meaningful traffic footprint. No contradictory evidence was observed, and the overall risk posture is low.

Infrastructure Integrity

The site operates on mainstream Amazon hosting with a directly observed United States endpoint and valid transport encryption. This is conventional enterprise-grade infrastructure and reduces routine availability and transport risks, although infrastructure quality is a supporting control rather than independent proof of business legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; institutional customers can proceed through ordinary vendor, contract, privacy, and payment-control due diligence.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100

Identity verification confidence	78%
----------------------------------	-----

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of andbeyond.media.

- The request stayed on andbeyond.media. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-26. NOTED
- The earliest public archive of this site is from 2015-02-07. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about andbeyond.media at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
