What andrewsrobinson.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a personal resume and portfolio for Andrew Robinson, presenting computer-engineering education, professional experience, projects, technical skills, certifications, and contact information for recruitment or professional engagement rather than direct financial transactions.

Scam/Impersonation Risk

A **confirmed external blacklist finding**, accompanied by multiple malicious and suspicious detections, creates a material contradiction that outweighs the site's benign presentation. The homepage appears to be a conventional professional portfolio and does not present a login, payment flow, financial service, or other sensitive interaction surface; however, that content profile does not explain or neutralize the external threat intelligence. No conflicting legal identities or clear on-page brand-impersonation pattern were identified, but the reputation contradiction warrants a security-forward posture and limits confidence in sensitive engagement.

EVIDENCE

- External reputation assessment recorded a confirmed blacklist condition and multiple malicious detections for the domain.
- The homepage is titled “Andrew Robinson - Computer Engineer” and presents resume content rather than a transactional service.
- The homepage analysis identified no login form, hidden form, password submission, wallet interaction, or external form destination.

Regulatory Verification Notes

The About and Resume content identifies an individual professional and describes education, employment, projects, skills, and certifications, but those on-site claims are not independent proof of real-world identity. The site does not present a regulated financial or investment offering, and no licensing claim or registration number is supplied; this is a disclosure limitation relevant if the site is being considered for a role, supplier relationship, or other formal engagement. The domain has established registration continuity and uses a known registrar and valid transport encryption, which are ordinary technical legitimacy signals, but they do not overcome the external reputation contradiction. The available third-party broker context produced no match.

EVIDENCE

- Domain registered on 2020-03-10T15:46:25Z and recorded as 6.45 years old; expiry recorded as 2027-03-10T15:46:25Z.
- Domain registrar: Cloudflare, Inc.
- Hosted on AS701 (UUNET - Verizon Business, US).
- TLS certificate issued by YR2 (DV), valid to 2026-10-29T04:22:21+00:00.

What to Verify Next

Before any consequential engagement, independently authenticate the individual's identity, employment history, and certifications through the linked professional profile and an offline or separately sourced contact route. Any request for credentials, personal information, payment, file transfer, or access to an organizational system should require independent confirmation through an established channel unrelated to the website.

EVIDENCE

- The Resume and About content makes specific education, employment, project, and certification claims that can be checked against independent records.
- The site links to LinkedIn as an external professional profile.
- The Contact page publishes direct phone and email contact details for out-of-band confirmation.

Summary Verdict

The overall posture is **critical trust risk** because authoritative external reputation contradictions materially undermine confidence in otherwise professional-looking portfolio content. The site may be a genuine personal resume, but its real-world identity and safe suitability for sensitive interaction are not established by the available evidence.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure and can improve delivery resilience, but it is not proof of legitimacy. The observed address was an edge address, and the origin was not observable in this analysis.

EVIDENCE

- CDN/WAF provider: Cloudflare.
- Observed edge IP: 100.16.223.25.
- Infrastructure country: US; registry: ARIN.
- Origin candidate count: 0.

Closing Assessment

Until the external reputation issue is independently resolved, activity should remain limited to passive review and independently confirmed professional contact; credentials, sensitive personal information, payments, and system access should not be provided through the site.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%
• Trusted social count=1	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of andrewsrobinson.com.

- The request stayed on andrewsrobinson.com. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-10. NOTED
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on UUNET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about andrewsrobinson.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
