

Is anemom.com a scam? TrustSniffer's high-risk assessment: 0/100

anemom.com

Verdict

0

OUT OF 100

CRITICAL RISK

anemom.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Turkish-language online shop ('Anemom') selling vintage-style home and lighting products. Contains product listings, prices in TL, contact info and standard store/legal links. No apparent investment, crypto or phishing behavior present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://anemom.com/

What anemom.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Anemom is a Turkish-language online storefront presenting vintage and retro home décor, lighting, shelving, fixtures, and related products priced in Turkish lira. Its apparent business model is direct retail through product listings, shopping-cart functionality, customer accounts, checkout, and associated shop policies.

Scam/Impersonation Risk

The site's visible content does not present investment, cryptocurrency, phishing, or other obvious abuse themes, and no brand impersonation or conflicting legal identities were identified. Nevertheless, external threat intelligence recorded a confirmed **blacklist** hit, including multiple malicious detections and additional suspicious detections; this is a material contradiction that outweighs the otherwise ordinary retail presentation. Confirmed behavioral testing also identified substantial post-interaction document changes and repeated console errors. These technical anomalies are not independently proof of malicious activity, but they reinforce the need to treat account, credential, and payment interactions as unsafe until the external detections are resolved.

EVIDENCE

- External reputation checks recorded 4 malicious detections, 2 suspicious detections, and a confirmed blacklist hit for the website.
- The homepage presents a conventional Turkish e-commerce storefront with vintage home and lighting products and no identified investment, crypto, or phishing content.
- Behavioral testing confirmed 2 successful runs, 2,062 maximum DOM changes after interaction, and 12 console errors.
- Historical records show the domain first seen on 2003-12-19 and last seen on 2026-06-09, with 24 years tracked; the historical assessment found no suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site provides contact information and standard store and legal links, but the available material does not independently verify the real-world operator or establish licensing or registration credentials. No regulated financial service is presented, so the principal regulatory issue is merchant-identity and consumer-disclosure verification rather than a specific financial authorization. The available third-party broker dataset produced no match; that result is contextual only and does not validate the retailer.

EVIDENCE

- The registration record identifies IHS Telekom, Inc as registrar and shows creation on 2015-06-01T10:13:23Z, with an age of 11.23 years.
- Hosting is provided by NETINTERNET - Netinternet Bilisim Teknolojileri AS, TR, on AS51559.
- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-10-16T10:00:11+00:00.
- The homepage and shop navigation expose account, checkout, contact, shipping, and returns-related functionality, but the captured content does not establish a verified legal operator or license number.

What to Verify Next

Sensitive interaction should remain suspended while the blacklist and malicious-detection findings are independently investigated. If a transaction is necessary, the merchant's legal identity, business registration, delivery and return obligations, and payment-protection arrangements should be confirmed through authoritative sources and independently obtained contact channels rather than relying solely on the website. Credentials should not be reused, and payment should not proceed unless the external detections are cleared and the merchant information is satisfactorily validated.

EVIDENCE

- The site exposes login, registration, and checkout forms, creating a direct sensitive-interaction surface.
- The contact page publishes a telephone contact, providing a channel that can be checked independently against authoritative business records.
- The site includes standard store-policy and legal-link areas that can be reviewed for enforceable seller, refund, delivery, and dispute information.
- The external assessment coverage was complete, with no unevaluated providers reported.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The website's ordinary retail appearance does not offset the confirmed external threat and blacklist contradictions, while the real-world operator remains unverified.

Infrastructure Integrity

The site is fronted by a CDN/WAF arrangement, with observed edge addresses on AS16509 and a potential origin candidate also identified during resolution. Its direct hosting is with NETINTERNET - Netinternet Bilisim Teknolojileri AS in Türkiye; this infrastructure may reduce routine exposure, but it is only a mitigating technical control and does not establish legitimacy or counter the external reputation findings.

Closing Assessment

Enterprise users should block or closely restrict credential and payment activity involving the site pending independent resolution of the external detections and confirmation of the merchant's identity and transaction protections.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of anemom.com.

- The request stayed on anemom.com. It was not redirected to another domain. CLEAR
- Registration is published under IHS Telekom, Inc. CLEAR
- DNS for this domain is served by net.tr, across 2 name servers. NOTED
- The registration is paid up to 2027-06-01. NOTED
- The earliest public archive of this site is from 2003-12-19. CLEAR
- It is hosted on NETINTERNET, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about anemom.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
