Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Anglo Asia Cornwall is a local Indian restaurant and takeaway website serving Helston, Cornwall, with a menu, reservations, online ordering, delivery information, contact details, and in-person dining services.

Scam/Impersonation Risk

A confirmed blacklist finding creates a material contradiction with the otherwise ordinary restaurant presentation and results in an elevated risk posture for sensitive interactions. The homepage and linked ordering functions appear consistent with a local food business, and no separate brand-impersonation or conflicting-identity signal is recorded; however, that benign content does not resolve the external threat determination. The domain has a substantial registration and archive history, which supports continuity but does not neutralize the reputation warning. The independently verified operator identity also remains unconfirmed.

EVIDENCE

- The homepage presents Anglo Asia Cornwall as an Indian restaurant and takeaway with menu, reservation, ordering, and delivery functions.
- External threat intelligence records the domain as blacklisted; one malicious and one suspicious detection were also recorded.
- The domain was registered in 2015, approximately 11.34 years ago, through Fasthosts Internet Ltd.
- The site has 513 archive snapshots spanning 2016–2026, with 11 years tracked.

Regulatory Verification Notes

The site's apparent business model is ordinary restaurant and takeaway commerce rather than a regulated financial service. The supplied content links to Terms and Conditions and Privacy Policy pages, but no license or registration number is presented; this is a disclosure gap requiring ordinary business verification, not independent proof of misconduct. The published business identity is therefore apparent from the site but not independently verified. Transport security is present, although a domain-validated certificate confirms control of the domain rather than the legal identity of its operator.

EVIDENCE

- The homepage links to Terms and Conditions, Privacy Policy, About, Contact, Reservation, and Order Online pages.
- The site's hosting infrastructure is AS8560, IONOS-AS — IONOS SE, DE.
- The transport certificate is issued by YR1 at DV validation level and is valid until 2026-10-28 02:28:18 UTC.

What to Verify Next

Before placing an order or providing payment information, an independent check should confirm that the published restaurant name, premises, telephone details, and ordering destination correspond to the genuine local business. Payment should be made only through a channel providing clear transaction records and applicable consumer protection. The site's terms, privacy, refund, and delivery provisions should also be reviewed, and official contact channels should be confirmed through an independent route before sensitive communication.

EVIDENCE

- The reservation and online-order pages create the principal customer transaction paths.
- The Terms and Conditions and Privacy Policy are available as dedicated internal pages.
- The homepage states delivery charges of £3.00 within a three-mile radius and £6.25 within a six-mile radius.

Summary Verdict

The overall posture is **low trust**, with sensitive interaction risk driven by a confirmed external reputation contradiction. The site's coherent local-business presentation and long-running presence do not provide sufficient grounds to treat the operator's identity or transactional safety as established.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with the observed edge address operating on AS8560 under IONOS-AS — IONOS SE, DE; the origin server was not observable in this analysis. This reduces direct exposure of the origin but is only a mitigating technical control and does not establish legitimacy.

Closing Assessment

Engagement should remain limited until the business identity and transaction channel have been independently confirmed, with particular care given to credential, payment, and other sensitive actions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of angloasiahelston.co.uk.

- The request stayed on angloasiahelston.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Fasthosts Internet Ltd. CLEAR
- DNS for this domain is served by org., across 4 name servers. NOTED
- The registration is paid up to 2027-04-20. NOTED
- The earliest public archive of this site is from 2016-06-15. CLEAR
- It is hosted on IONOS-AS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about angloasiahelston.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
