

Is anhquict.com safe? TrustSniffer's low-trust assessment: 40/100

anhquict.com

Verdict

40

OUT OF 100

LOW TRUST

anhquict.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Vietnamese M&E contractor (Anh Qui Trading Construction Co.,Ltd) offering equipment sales, installation and 24/7 maintenance services for generators, HVAC, PCCC and water treatment; includes contact info, product listings, project case studies and company profile PDF.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Anh Qui Trading Construction Co.,Ltd is a Vietnamese corporate website presenting itself as a local mechanical and electrical contractor serving Can Tho and nearby provinces. Its stated business model covers the sale, installation, maintenance, and repair of generators, HVAC and ventilation systems, fire-protection systems, water-treatment infrastructure, and related M&E equipment for commercial and industrial clients.

Scam/Impersonation Risk

The site's content is consistent with a conventional local engineering contractor, and no conflicting legal identities or apparent brand impersonation were observed across the available company material. However, external reputation evidence records multiple malicious detections and a confirmed blacklist hit, creating a material contradiction to the otherwise professional presentation. The resulting concern is concentrated on sensitive interactions—particularly credential submission, account access, or financial engagement—rather than on the visible business model itself.

EVIDENCE

- External reputation checks recorded 3 malicious detections and 1 suspicious detection for the domain, together with a confirmed blacklist status.
- The homepage identifies the business as “Anh Qui Trading Construction Co.,Ltd” and describes generator, HVAC, fire-protection, water-treatment, and M&E services without presenting a separate competing entity name.
- Domain registration telemetry: registered 2021-03-10 (~5.45 years old), through P.A. Viet Nam Company Limited, expiring 2027-03-10.
- Historical telemetry records 198 archive snapshots spanning 2017–2026, covering 9 tracked years.

Regulatory Verification Notes

The website provides a company profile PDF, project material, service descriptions, product categories, and contact information, which supports an identifiable commercial narrative. The available pages do not state a license authority or license number; for an engineering contractor, that is a regulatory and procurement verification gap rather than standalone evidence of fraud. The independently connecting identity remains unverified, and the available third-party broker dataset contains no matching record; neither point should be treated as proof of legitimacy or illegitimacy.

EVIDENCE

- The “About” and company-profile material presents the legal-style name “Anh Qui Trading Construction Co.,Ltd” and claims more than 20 years of experience.
- The services and project sections describe equipment supply, installation, repair, maintenance, and infrastructure contracting for local clients.
- Hosted on AS45544 (SUPERDATA-AS-VN - SUPERDATA-VN, VN); registry: APNIC; country: VN.
- TLS certificate issued by YE2, DV validation, valid to 2026-09-28.

What to Verify Next

Before any sensitive or financial engagement, the prospective counterparty should independently confirm the company’s legal registration, operating address, tax or business identifiers, and any permits relevant to generator, fire-protection, HVAC, or water-treatment work through applicable Vietnamese registries or procurement records. The company profile PDF and project references should be validated through independently sourced customer or contractor contacts, rather than relying solely on contact details published on the site. Any payment arrangement should use a protected commercial method with a written contract, defined deliverables, acceptance criteria, and verifiable invoicing details. Contact channels should also be confirmed through an independent, offline route before credentials, documents, or funds are exchanged.

EVIDENCE

- The homepage publishes a Can Tho address, telephone numbers, and a Gmail contact address alongside Zalo technical support.
- The “Profile” download offers a company capability document for review.
- The project and news sections provide the stated basis for checking past work and claimed experience.

Summary Verdict

The website has a credible-looking contractor presentation and substantive business content, but its overall trust posture is low because external threat detections and a confirmed blacklist materially outweigh those positive content signals. The operator’s real-world identity is not independently verified, so the site should not be treated as established or safe for sensitive interaction.

Infrastructure Integrity

The domain resolves to a single apparent origin address on AS45544, operated by SUPERDATA-AS-VN - SUPERDATA-VN in Vietnam, with no CDN or WAF identified. A valid DV TLS certificate provides transport encryption, but it authenticates control of the domain rather than the underlying business and therefore does not offset the external reputation contradiction.

Closing Assessment

Treat the site as suitable only for limited, non-sensitive review until the company, its regulatory standing, and its commercial references have been independently confirmed; sensitive credentials and funds should not be committed on the basis of the website alone.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of anhquict.com.

- The request stayed on anhquict.com. It was not redirected to another domain. CLEAR
- Registration is published under P.A. Viet Nam Company Limited. CLEAR
- DNS for this domain is served by pavietnam.vn, across 3 name servers. NOTED

- The registration is paid up to 2027-03-10. NOTED
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on SUPERDATA-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about anhquict.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
