

Is animalsabroad.com legit? TrustSniffer's high-trust assessment: 80/100

animalsabroad.com

Verdict

80
OUT OF 100

HIGH TRUST

animalsabroad.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Family travel blog 'Animals Abroad' with destination sections (Africa, Asia, Europe, Americas, Oceania), itineraries, tips and blog posts. Social links to Facebook, Instagram and YouTube are present. No signs of financial solicitation or credential harvesting.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Animals Abroad is a content-driven family travel blog presenting destination guides, itineraries, travel-planning advice, and personal stories from a family's 17-month journey around the world, with an apparent business model based on informational content and possible advertising, affiliate, sponsored, or partnership activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent travel-blog purpose, with destination coverage across Africa, Asia, Europe, the Americas, and Oceania, and the available content contains no financial solicitation, credential-harvesting mechanism, login form, wallet functionality, or detected brand-impersonation indicators. Evaluated reputation checks found no malicious or suspicious detections, no abuse reports, and no confirmed threat or phishing indicators; coverage was partial, so this is supportive rather than conclusive evidence. The domain's established registration history further supports continuity consistent with the current travel-blog presentation.

EVIDENCE

- Homepage: describes “Animals Abroad” as a family travel inspiration and tips resource covering destination planning, long-term travel, and travel with children.
- Homepage and site behavior: no sensitive form, external password form, hidden form, wallet connection, clipboard manipulation, or cloaking was detected.
- Registration record: registered 2018-08-04 and approximately 8.05 years old.

Regulatory Verification Notes

The site appears to operate as an informational travel publication rather than a financial or otherwise visibly regulated service. Its navigation includes About Us and Contact pages, and links to Facebook, Instagram, and YouTube provide ordinary public-facing identity and communication channels; however, the real-world operator is not independently verified by the available evidence. The registration record names Register.ca Inc as registrar and uses SafeWhois.ca Whois Privacy Service, an administrative privacy arrangement rather than an identity contradiction. No separate licensing assessment is material to the apparent editorial travel-blog model, although any future paid booking, travel-sales, or partner service should be assessed according to the obligations applicable to that activity.

EVIDENCE

- Homepage: identifies the site as a family travel resource and describes destination guides, itineraries, travel tips, and personal travel experiences.
- Site navigation: includes About Us and Contact pages, with social links to Facebook, Instagram, and YouTube.
- Registration record: registrar is Register.ca Inc; registrant organization is SafeWhois.ca Whois Privacy Service.
- Transport encryption: TLS certificate issued by YR1 using DV validation, valid to 2026-10-03.

What to Verify Next

Before credential or payment interaction, an interested party should independently confirm the operator details shown on the About Us and Contact pages, establish that any advertised partner or booking service is the intended counterparty, and review the applicable cancellation, refund, and payment-protection terms. Contact channels should be corroborated through an independent route rather than relying solely on a single webpage.

EVIDENCE

- About Us page: use the stated family and editorial background as the starting point for independent identity corroboration.
- Contact page: confirm that published contact routes correspond to the site’s maintained social presence.
- Any future booking or commercial-offer page: confirm the named merchant, refund terms, and payment protections before transaction execution.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk travel website. The high-trust classification is supported by coherent page content, benign observed behavior, clean evaluated reputation signals, and an established technical presence, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves directly to infrastructure operated by FIBERHUB - VegasNAP, LLC in the United States, with no CDN or WAF identified and a visible hosting origin. This is ordinary hosting infrastructure and provides less intermediary shielding than a major edge network, but no infrastructure-based contradiction was identified.

EVIDENCE

- Hosting infrastructure: served from AS53340, FIBERHUB - VegasNAP, LLC, US.
- Network resolution: one resolved IP address, 162.251.236.84, with one likely origin address and zero detected edge IPs.
- TLS telemetry: issuer YR1, validation level DV, valid through 2026-10-03.

Closing Assessment

Normal informational browsing is proportionate to the available evidence; before submitting credentials or payment details, ordinary independent checks of merchant identity, contractual terms, and payment protection should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of animalsabroad.com.

- The request stayed on animalsabroad.com. It was not redirected to another domain. CLEAR
- Registration is published under Register.ca Inc. CLEAR
- DNS for this domain is served by sectionthirtysix.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-04. NOTED

- The earliest public archive of this site is from 2007-06-29. CLEAR
- It is hosted on FIBERHUB, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about animalsabroad.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
