Full analysis

Overview

Animaluca is a Brazilian local-business website offering party and event services through the rental of inflatable toys, games, monitors, and related entertainment equipment. Its presentation includes service descriptions, item listings, reservation prompts, testimonials, contact details, and claims of completed events and satisfied customers, indicating a conventional local-services business model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent party-rental business rather than an investment, cryptocurrency, or credential-harvesting operation, and the supplied content contains no indicators of phishing, brand impersonation, malicious activity, or sensitive login collection. The homepage's counters—claiming 3,631 events completed, 15 trained promoters, 19 differentiated items, and 1,450 satisfied customers—and its testimonials are marketing assertions that are not independently substantiated in the supplied evidence,

but they do not constitute an impersonation or scam signal. Available reputation checks found no blacklist, phishing, or malware indication.

EVIDENCE

- The homepage describes rental services for inflatable toys, games, monitors, and event activities, with “Reserve Now” calls to action.
- The homepage contains one contact form and no login, password, wallet, or other sensitive-data form.
- The domain registration record shows registration in 2010 (~16.46 years old).
- The historical archive record spans 2011-07-18 to 2026-06-07 (16 years tracked).

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate local business, but the real-world operator identity is not independently verified. The “Quem Somos” and “Contato” sections provide the Animaluca business presentation and visitor contact routes, while the supplied site evidence does not show a legal-entity registration number or licensing claim; for an equipment-rental business, this is a transparency and verification point rather than evidence of fraud. The reviewed third-party broker context produced no match, which is reputational context only and not a licensing determination.

EVIDENCE

- The “Quem Somos” page identifies the business as Animaluca and describes its event-service offering.
- The site’s hosting is identified as AS47583, AS-HOSTINGER — Hostinger International Limited, CY.
- The site’s TLS certificate is issued by WR1, uses DV validation, and is valid to 2026-10-12.

What to Verify Next

Before credential or payment interactions, an independent offline or registry-based check should connect the Animaluca trading name to the responsible legal operator. Booking arrangements should also be reviewed for cancellation, refund, service-delivery, and payment-protection terms, with contact channels confirmed through an independently obtained business source rather than relying solely on the website.

EVIDENCE

- The “Contato” section supplies the primary route for confirming the business relationship and booking arrangements.
- The homepage directs visitors toward reservations for individual rental items, making service terms and payment protections relevant to prospective transactions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The positive assessment concerns the website’s observable trust signals; it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site resolves to three likely origin IP addresses with no edge IPs or detected CDN, and is hosted on AS47583 by Hostinger International Limited. This is a straightforward hosting arrangement that provides a useful technical baseline, although hosting infrastructure alone is not proof of business legitimacy.

Closing Assessment

Routine engagement is reasonable, subject to ordinary independent confirmation of merchant identity, booking terms, and payment protections before submitting credentials or making a payment.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about animaluca.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
