Full analysis

Overview

This website is a personal and business coaching service for founders, leaders, and professionals, presenting information about Ankoor Naik's coaching approach, testimonials, media coverage, articles, and booking options for paid one-to-one consultations and coaching sessions.

Scam/Impersonation Risk

Contradictory external reputation signals materially outweigh the site's otherwise professional presentation. The domain has been blacklisted, and four external malicious classifications were recorded. No brand impersonation, phishing form, or conflicting legal identity was identified in the supplied page analysis, while the homepage's claims of "10+ years," "10,000+" sessions, and "2,000+" entrepreneurs, leaders, and professionals remain self-reported marketing assertions rather than independently established credentials. The two abuse reports associated with shared delivery infrastructure are discounted because they apply to a shared provider IP rather than being specifically attributed to this website; that limitation does not offset the confirmed blacklist signal.

EVIDENCE

- External reputation assessment recorded 4 malicious detections and a confirmed blacklist.
- Homepage presents self-reported scale claims of “10+ years,” “10,000+” sessions, and “2,000+” clients or participants.
- Homepage analysis found no login form, hidden form, wallet interaction, or password-collection behavior.
- Domain registration continuity: registered 2020-04-26 (~6.32 years old); 344 archive snapshots spanning 2018–2026 (9 years tracked).

Regulatory Verification Notes

The site presents a coaching business rather than a regulated financial service, and no license or registration number is claimed in the supplied material. The legal and identity disclosure position is therefore unclear for independent verification, and the real-world operator identity remains unverified. The private registration recorded through GoDaddy.com, LLC is an administrative attribution limitation, not by itself evidence of misconduct. No matching broker signal was identified in the supplied third-party context.

EVIDENCE

- WHOIS registrar: GoDaddy.com, LLC; registrant organization: Domains By Proxy, LLC; owner status: Registration Private.
- The site’s stated business model is paid one-to-one clarity and business coaching, bookings, and consultations.
- Hosting telemetry: served on AS209242, CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- TLS telemetry: DV certificate issued by WE1, valid to 2026-09-24T02:18:51+00:00.

What to Verify Next

Before any paid engagement, an independent check should confirm the coach’s identity, business registration where applicable, refund and cancellation terms, and the legal entity that would receive payment. Any claimed media appearances, testimonials, years of experience, and client outcomes should be corroborated through independently controlled sources. Contact and booking channels should also be confirmed through an independent route before sharing personal or payment information.

EVIDENCE

- The supplied identity verification result does not independently connect the site to a verified real-world operator.
- The supplied site material contains no stated license authority or license number.
- The homepage uses testimonials, media references, and quantified experience and client-outcome claims as primary credibility elements.

Summary Verdict

The overall posture is low trust with elevated risk for sensitive interaction. The site’s coherent coaching presentation and absence of obvious credential-harvesting behavior do not resolve the material external

reputation contradiction. Identity and legitimacy should therefore be treated as apparent but unproven, with passive review preferable to sensitive engagement.

Infrastructure Integrity

The website is fronted by Cloudflare CDN/WAF infrastructure, with observed traffic terminating at a CDN edge and no origin server identified in the supplied network analysis. This provides a meaningful protective layer against direct origin exposure, but it is only a mitigating infrastructure characteristic and does not establish site legitimacy.

Closing Assessment

Restrict activity to passive review unless independent identity, payment, and service-delivery checks produce satisfactory results; credentials, personal data, and financial information should not be submitted on the basis of the website’s presentation alone.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [ankoornaik.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
