What annemarieolson.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the website of AnneMarie Olson, LCSW, a San Rafael, California private practice offering individual therapy, end-of-life doula services, advance care planning, and LCSW supervision through appointment-based consultations and professional services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-content, or blacklist indicators. The homepage presents a coherent healthcare-practice model, identifies AnneMarie Olson as an LCSW, describes specific services, and provides service agreements rather than financial solicitations or unusual transaction mechanisms. The site's behavioral testing also found no login form, hidden form, wallet interaction, external posting, cloaking, clipboard activity, or suspicious script behavior. This supports an apparently legitimate, low-risk website, while the operator's real-world identity remains independently unverified.

EVIDENCE

- The homepage identifies “AnneMarie Olson, LCSW,” describes therapy, end-of-life doula, advance care planning, and supervision services, and states a San Rafael, Marin County, California location.
- The homepage links to Therapy, Doula, and ACP Service Agreements, a Privacy Policy, and Contact information.
- Behavioral observation recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, 0 wallet-connect runs, 0 suspicious inline scripts, and no cloaking.
- Domain registration telemetry records creation on 2020-03-07 and an age of 6.46 years; the registrar is Namecheap, Inc.

Regulatory Verification Notes

The site makes a professional-credential claim by displaying “LCSW #27955” and describes services associated with clinical social work and care planning. The supplied evidence does not independently verify that credential with a licensing authority, and it does not identify a regulatory source; this is a verification point rather than evidence of deception. The site does provide service agreements and a privacy policy, which is appropriate for an appointment-based healthcare practice. Ownership privacy is an administrative limitation, not an identity contradiction. No separate third-party broker match was identified, and the available external reputation observations were clean, subject to partial coverage.

EVIDENCE

- The homepage displays “LCSW #27955” and identifies the practice location as San Rafael, Marin County, California.
- The homepage provides Therapy Service Agreement, Doula Service Agreement, ACP Service Agreement, and Privacy Policy links.
- The site’s transport encryption uses a DV certificate issued by WE1, valid through 2026-10-22.
- The website is served through AS13335, operated by CLOUDFLARENET—Cloudflare, Inc., US.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the displayed LCSW credential with the relevant California licensing registry and confirm that the practitioner’s legal and professional details correspond to the practice. Standard healthcare-service checks should also confirm appointment terms, cancellation or refund provisions, privacy handling, and payment-protection options using information obtained independently of the site. Official contact channels should be confirmed through an independent route before sensitive information is shared.

EVIDENCE

- The homepage provides the practitioner name, credential number, practice location, and appointment-based service descriptions needed for registry comparison.
- Separate service agreements are available for therapy, doula, and advance-care-planning services.
- The homepage states that consultations and services are available by appointment.
- The page contains no login form or sensitive data-entry form in the observed interaction surface.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website for a small professional healthcare practice. Its high-trust, low-risk posture is supported by coherent service content, clean observed behavior, and the absence of contradictory signals, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF infrastructure, with observed traffic served from Cloudflare edge addresses rather than an exposed origin address. This provides a meaningful layer of transport and edge protection, but it is a mitigating technical control rather than proof of the operator’s identity or professional credentials.

Closing Assessment

Normal browsing is proportionate to the observed risk posture; independent credential, service-term, contact-channel, and payment-protection checks should be completed before sharing sensitive information or making payments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of annemarieolson.com.

- The request stayed on annemarieolson.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-07. NOTED
- The earliest public archive of this site is from 2011-02-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about annemarieolson.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
