- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Annuaire Gratuit du Maroc is a Moroccan local-search and business-directory website presenting free professional listings, contact details, city and category navigation, featured advertisements, train schedules, pharmacy information, and prayer times. Its apparent business model combines free public information with paid visibility through featured listings, advertising, and professional profiles.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational directory model, with no phishing, impersonation, malicious-content, or high-risk financial indicators. It offers ordinary local-search functions rather than investment, payment, or credential-harvesting mechanics; account access is presented as a standard site function.

- The homepage identifies the service as a Moroccan professional directory with more than 200,000 local addresses and featured listings.
- The homepage contains no sensitive submission form, hidden form, or external password destination.
- The domain was registered in 2011 and is approximately 15.01 years old.
- Historical coverage records 153 archive snapshots spanning 2011–2026, with 16 years tracked.

Regulatory Verification Notes

The site operates as an informational directory and does not present a financial-service or regulated-investment proposition in the analyzed content. No licensing claim or license number was identified; this is a limited disclosure point for any organization assessing the site as a commercial directory, but it does not indicate fraud. The registration record identifies ARCANES TECHNOLOGIES as registrar, while the site’s clean external reputation and sustained content continuity support its established identity.

- The homepage describes free listings, local advertising, professional profiles, and practical public-information services.
- The domain registration record lists ARCANES TECHNOLOGIES and a creation date of 2011-08-02.
- The site is hosted on AS51167, operated by CONTABO - Contabo GmbH, DE.
- TLS is issued by YE2 at DV validation level and is valid until 2026-10-04.

What to Verify Next

For formal procurement or partnership, confirm the operating entity and any applicable commercial-registration or advertising obligations through an independent registry. For account or advertising activity, confirm the official support and contact channels through an independently obtained business reference.

- The homepage provides professional-profile creation and advertisement-submission pathways.
- The homepage identifies the service as a Moroccan local directory rather than a regulated financial platform.
- The site’s external reputation checks recorded no malicious or suspicious detections.

Summary Verdict

The website presents as a legitimate, established, and trustworthy local-information service with a coherent purpose, sustained historical continuity, and no observed scam or impersonation indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a Contabo-hosted origin in Germany rather than through a CDN or WAF. This provides a clearly attributable hosting posture, although it offers less protective intermediary filtering than an edge-security deployment.

Closing Assessment

Routine browsing, account use, and ordinary directory interactions are proportionate to the site’s established trust posture; formal business engagements should follow the organization’s normal counterparty checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of annuaire-gratuit.ma.

- The request stayed on annuaire-gratuit.ma. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about annuaire-gratuit.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
