The page as captured

<https://antheamlhotel.com/>

What antheamlhotel.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Chinese-language hotel and accommodation booking platform for 安蒂娅美蘭酒店, presenting rooms, dining, meetings, leisure facilities, events, membership services, reservations, account registration, and booking enquiries. Its apparent business model is hospitality commerce: generating revenue through room bookings, banquets, dining, and related member services.

Scam/Impersonation Risk

The site presents a conventional hotel experience and its pages contain no explicit content red flags, but this benign presentation is outweighed by material external contradictions. Multiple external reputation assessments identified malicious or suspicious activity, and the domain is marked as **blacklisted** by two external sources. The site also supports login, registration, and reservation workflows, creating a sensitive interaction surface for credentials and booking-related information. No conflicting legal-entity names or confirmed brand-impersonation finding is present in the supplied page analysis; however, the operating identity remains unverified, so the hotel presentation should not be treated as proof of the real-world operator. The domain has an established

registration and recorded archival continuity, but those historical signals do not neutralize the current external threat detections.

EVIDENCE

- The homepage presents a hotel booking and membership platform with login, registration, reservation enquiry, and booking functions.
- The external reputation assessment recorded 8 malicious and 1 suspicious detections, with a Tier-1 security vendor flag.
- Two external blacklist sources marked the domain as blacklisted.
- Domain registration: 2019-01-03; age 7.64 years. The archive contains 405 snapshots spanning 2021-11-25 to 2026-05-12, across 6 tracked years.

Regulatory Verification Notes

The homepage footer displays the hotel name, an ICP filing number, a public-security filing number, membership terms, and a contact route, but these on-site disclosures do not independently establish the legal operator or any regulated authorization. No licensing claim or license number is presented in the supplied material, and ownership transparency is limited. This is a verification gap rather than, by itself, proof of fraud; in this case, however, it should be considered alongside the separate external blacklist findings. The transport certificate provides encryption but only domain validation, which confirms channel encryption rather than organizational identity.

EVIDENCE

- The homepage footer displays “©2018 All Rights reserved. 安蒂娅美蘭酒店,” ICP filing “粤ICP备 2024237261号,” and public-security filing “粤公网安备 44030602003988号.”
- The membership and terms areas provide account-use conditions, but no independently verified legal entity or licensing evidence is supplied.
- TLS certificate issuer: YE2; validation level: DV; valid to 2026-09-28T08:33:02+00:00.
- The registered registrar is eName Technology Co.,Ltd.; registration expires 2030-01-03T08:34:23Z.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the hotel, its booking channel, and the published contact routes correspond to a real operating property, using an offline or independently sourced channel rather than contact details supplied solely by the website. Any reservation or membership transaction should be checked against a payment method offering meaningful dispute protection, and credentials should not be reused from other services. The relevant Chinese business, accommodation, and filing records should also be matched to the hotel name and physical property before proceeding.

EVIDENCE

- The contact section publishes a hotel telephone contact and identifies the establishment by name.
- The homepage links membership terms and account-registration functions that should be reviewed before account creation.
- The booking interface requests arrival and departure details and supports reservation lookup, making independent confirmation of the reservation endpoint material.

Summary Verdict

The overall posture is critical for sensitive interaction. Although the website's content is consistent with a normal hotel business and the domain has historical continuity, the confirmed blacklist status and malicious external detections dominate the assessment, while the real-world operator remains unverified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with the observed edge address served from AS45090, TENCENT-NET-AP — Shenzhen Tencent Computer Systems Company Limited, in China; the origin server was not observable. This edge-layer protection can reduce direct exposure of the origin and is a mitigating technical control, but it does not establish legitimacy or offset the external reputation risk.

Closing Assessment

Sensitive actions, including login, credential submission, reservations, and payment, should be deferred until the hotel's identity and booking channels have been independently confirmed through trusted offline or institutionally sourced contact routes.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of antheamlhotel.com.

- The request stayed on antheamlhotel.com. It was not redirected to another domain. CLEAR
- Registration is published under eName Technology Co.,Ltd.. CLEAR
- DNS for this domain is served by ename.net, across 2 name servers. NOTED
- The registration is paid up to 2030-01-03. CLEAR
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on TENCENT-NET-AP, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about antheamlhotel.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
