

Is antiracismfascism.org legit? TrustSniffer's high-trust assessment: 80/100

antiracismfascism.org

Verdict

80

OUT OF 100

HIGH TRUST

antiracismfascism.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Greek activist/news site (KEERFA) publishing articles on migration, state violence, and calls for protests and donations. Content is editorial and campaign-focused; includes donation IBAN and shop items but no investment or credential-harvesting elements on the captured page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Greek editorial and activist website associated with KEERFA, publishing material on migration, anti-racism, human rights, state violence, demonstrations, and campaign activity. Its apparent operating model is public-interest journalism and activism supported by donations and sales of branded goods.

Scam/Impersonation Risk

No contradictions were observed. The homepage is content-rich and campaign-focused rather than presenting an investment, trading, credential-harvesting, or impersonation proposition; the available analysis found no login form, sensitive form, wallet connection, malicious behavior, or suspicious external submission activity. References to donations and merchandise are consistent with the stated activist publishing model and, on the supplied evidence, do not indicate a scam mechanism. The site's sustained historical continuity further supports an established web presence, although it does not independently verify the real-world operator.

EVIDENCE

- The homepage contains extensive Greek-language editorial material on migration, anti-racism, protests, asylum cases, and state violence, with no detected phishing or credential-harvesting indicators.
- The homepage navigation identifies sections for contact, organizational information, founding material, decisions, local committees, campaign materials, a shop, and donation-related activity.
- Behavioral testing recorded 0 external XHR/fetch requests, 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 suspicious inline scripts across 2 successful runs.
- The domain was registered in 2009 and is approximately 16.95 years old; its archive contains 704 snapshots spanning 2009-11-02 to 2026-08-02 across 18 tracked years.

Regulatory Verification Notes

The website appears to operate as an editorial and activist organization rather than as a financial or investment service. The supplied pages do not establish an independently verified legal operator, and no licensing or registration number is presented as a verified regulatory credential; this is a transparency point for ordinary organizational or donation due diligence, not evidence of impersonation or fraud. The navigation does provide organizational sections, but the available material does not independently connect the site to a confirmed legal entity. The domain's long registration continuity, reputable registrar, valid transport encryption, and stable infrastructure are nevertheless consistent with an established site.

EVIDENCE

- The organizational navigation includes “Για την ΚΕΕΡΦΑ” (“About KEERFA”), “Ιδρυτική” (“Founding”), “Αποφάσεις” (“Decisions”), and “Συντονιστικό” (“Coordination”) sections.
- Registration records identify Enartia Single Member S.A. as registrar; creation date: 2009-09-13T13:13:05Z; expiration date: 2026-09-13T13:13:05Z.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-11-16T04:32:24+00:00.

What to Verify Next

Before making a donation, placing a merchandise order, or submitting credentials, an institution should independently confirm the organization's legal identity and the authenticity of its published payment and contact channels. Donation or purchase activity should use payment methods offering appropriate transaction records and payment protection, with the applicable returns and delivery terms confirmed in advance. Where regulatory status is relevant to the intended transaction, the relevant national registry should be checked directly rather than inferred from the website's presentation.

EVIDENCE

- The homepage and navigation provide contact and organizational sections that can be compared with independently sourced organizational information.
- The site presents donation and shop functions, creating a specific need to confirm the recipient and merchant details before payment.
- No sensitive form or untrusted form destination was detected in the captured page.

Summary Verdict

Available evidence supports an established, apparently legitimate website with a low overall risk posture and no observed scam or impersonation contradictions. The assessment supports ordinary website use in principle, but the real-world operator identity remains independently unverified, so legitimacy should be regarded as evidence-consistent rather than proven.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF protection. The observed addresses, 104.21.38.78 and 172.67.220.23, are CDN edge servers rather than an identified origin; this reduces direct origin exposure and is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Proceed with ordinary independent identity, transaction, return-policy, and payment-protection checks before credential or payment interactions, particularly where donations or purchases are involved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of antiracismfascism.org.

- The request stayed on antiracismfascism.org. It was not redirected to another domain. CLEAR
- Registration is published under Enartia Single Member S.A.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-13. NOTED
- The earliest public archive of this site is from 2009-11-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about antiracismfascism.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
