

Is antoniaconf.ro safe? TrustSniffer's low-trust assessment: 25/100

antoniaconf.ro

Verdict

25

OUT OF 100

LOW TRUST

antoniaconf.ro is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Retail website for Antonia Conf, a Romanian manufacturer and seller of medical uniforms (since 2017). The site lists product collections, prices in lei, shipping and return policies, contact phone numbers and emails, ISO certifications, and B2B ordering options. Clear company registration data and factory address are provided.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Antonia Conf is a Romanian retail and business-to-business e-commerce website presenting itself as a manufacturer and seller of medical uniforms, with product collections, prices, factory-production claims, shipping and returns information, contact channels, and bulk-order services.

Scam/Impersonation Risk

The site's pages present a coherent medical-uniform retail business and no on-page phishing, brand-impersonation, or conflicting legal-entity indicators were identified. However, the domain is subject to a confirmed blacklist finding, with multiple external malicious or suspicious detections; this is a material contradiction that outweighs the otherwise professional storefront presentation. A separate abuse report concerns the shared hosting provider's IP infrastructure rather than being uniquely attributed to the website, but it remains supporting negative context. The available evidence does not independently verify that the on-page business identity is the operator behind the domain.

EVIDENCE

- The homepage presents Antonia Conf as a Romanian manufacturer of medical uniforms with factory production, product categories, shipping terms, and business-order options.
- External reputation checks recorded 3 malicious and 2 suspicious detections, alongside a confirmed blacklist finding from two external sources.
- Domain registration evidence records creation on 2019-01-19 and an age of 7.59 years.

Regulatory Verification Notes

The website presents company registration information, a factory address, contact details, ISO 9001, ISO 14001, and ISO 13485 claims, as well as commercial terms and a 14-day return policy. These disclosures make the business model appear specific and commercially structured, but they do not independently establish the identity of the real-world operator or validate the certifications. No regulated financial-service licence is claimed in the supplied material; the principal regulatory issue is therefore verification of the trading entity, commercial registration, and any certification claims rather than an inference of financial-service misconduct. The absence of an independently confirmed operator connection remains significant in light of the external blacklist result.

EVIDENCE

- The homepage and company-information content identify the business as a Romanian medical-uniform manufacturer and display factory, contact, registration, and certification claims.
- Hosting resolves through AS43927, operated by HOSTERION - HOSTERION SRL, Romania.
- The site uses a DV TLS certificate issued by YR2, valid until 2026-11-15T16:45:15+00:00.

What to Verify Next

Before any sensitive interaction, an independent registry check should confirm that the company registration details and factory address correspond to an active Romanian business. Certification claims should be validated with the relevant certification bodies, and the published contact channels should be confirmed through an independently sourced route rather than relying solely on the website. Any purchase should use payment methods with transaction-dispute protection, and credentials should not be reused on this site.

EVIDENCE

- The site includes company, factory, contact, shipping, and return information that can be compared with independent business records.
- The checkout and contact functionality provide the interaction points requiring confirmation before payment or personal-data submission.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site has a credible-looking retail presentation, but the confirmed external reputation contradiction and the lack of independent operator verification prevent the available evidence from supporting normal confidence in login, credential, or financial activity.

Infrastructure Integrity

The site is hosted directly on Hosterion infrastructure without a detected CDN or WAF, and one likely origin IP is exposed rather than being shielded behind an edge network. This provides limited infrastructure-level mitigation and should be treated only as a technical posture observation, not as proof of malicious activity or legitimacy.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, with 0 CDN edge IPs and 1 likely origin IP.
- The hosting environment is operated by HOSTERION - HOSTERION SRL in Romania.

Closing Assessment

Pending independent confirmation of the trading entity and external reputation issue, activity should remain limited to non-sensitive browsing; login, credential submission, and financial transactions should not proceed.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 92.114.98.150 (HOSTERION-SRL, Data Center/Web Hosting/Transit), 1% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of antoniaconf.ro.

- The request stayed on antoniaconf.ro. It was not redirected to another domain. CLEAR
- Registration is published under Hosterion SRL. CLEAR
- DNS for this domain is served by hosterion.com, across 4 name servers. NOTED
- The earliest public archive of this site is from 2020-12-18. CLEAR
- It is hosted on HOSTERION, from a server in RO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about antoniaconf.ro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
