

Is antuenergia.cl safe? TrustSniffer's moderate-trust assessment: 50/100

antuenergia.cl

Verdict

50

OUT OF 100

MODERATE TRUST

antuenergia.cl is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Antü Energía is a Chile-based company offering clean energy solutions: turnkey projects, solar installation maintenance, and energy consultancy. Contact email provided; site content is marketing/informational with service descriptions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What antuenergia.cl served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Antü Energía is a Chile-based clean-energy services website presenting turnkey renewable-energy projects, solar-installation maintenance, and energy consultancy for individuals, public bodies, and private organizations; its apparent business model is to obtain project, installation, maintenance, and consulting contracts.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other direct scam contradictions were observed. The homepage is an informational corporate presentation, with no login facility, sensitive-data form, wallet interaction, or credential-harvesting behavior identified. Its domain has a continuous multi-year presence, and major external malware and reputation checks returned no malicious or suspicious detections. A softer reputational signal exists because 15 abuse reports were associated with a shared Squarespace content-delivery IP; the attribution is to shared infrastructure rather than specifically to Antü Energía, so this does not establish malicious activity by the website.

EVIDENCE

- The homepage describes renewable-energy services and contains no login or sensitive-information form.
- Behavioral testing recorded no hidden forms, external password forms, wallet connections, clipboard manipulation, or cloaking.
- Domain registration continuity dates to 2017 (~9.16 years old); the archive record contains 72 snapshots spanning 2017–2025 (9 years tracked).
- External reputation checks recorded 0 malicious and 0 suspicious detections, while 15 reports were associated with shared provider IP 198.49.23.145.

Regulatory Verification Notes

The available content is consistent with an energy-services business, but the real-world operator remains unverified. The site does not present a licensing claim, registration number, or other clearly identifiable legal-entity disclosure in the reviewed content; this is a verification and transparency gap, not evidence of fraud. The stated services may involve permits or sector requirements depending on the project, and the site alone does not establish that any applicable requirements are satisfied.

EVIDENCE

- The homepage's "Quiénes somos" content provides a business self-description but no independently verifiable legal-entity identifier.
- The homepage presents project quotation and contact mechanisms without a displayed license or registration number.
- The homepage lacks a structured-data identity record and a meta description, limiting machine-readable corporate identification.

What to Verify Next

Before a high-value project commitment, independently confirm the contracting entity through the relevant Chilean business and sector registries, and establish which permits or professional authorizations apply to the proposed installation. Confirm the official contact channels through an independent source and ensure that contracts identify the legal counterparty, scope of work, warranties, payment milestones, and remedies for non-performance.

EVIDENCE

- The homepage's project-quotation invitation provides the basis for confirming the legal counterparty before contracting.
- The described installation and maintenance services provide the basis for checking applicable Chilean permits or sector requirements.
- The site's contact mechanism should be cross-checked against an independently obtained corporate record or offline business reference.

Summary Verdict

The website supports a **moderate-trust** posture. Available evidence is consistent with an apparently legitimate corporate service website, and no direct scam or impersonation contradictions were observed; however, the operator’s real-world identity and governance are not independently verified, so legitimacy should be regarded as apparent rather than proven.

Infrastructure Integrity

The website is fronted by Cloudflare CDN/WAF infrastructure, with all observed addresses appearing to be edge servers rather than an exposed origin; this reduces direct origin exposure but is only a mitigating technical control and does not establish operator legitimacy.

EVIDENCE

- Served from AS53831 (SQUARESPACE – Squarespace, Inc., US), including observed edge server 198.185.159.144.
- Cloudflare CDN/WAF protection was identified; 4 edge IPs were observed and 0 origin candidates were identified.
- TLS certificate issued by YR1 with DV validation, valid to 2026-10-17 05:34:58 UTC.

Closing Assessment

Ordinary informational interaction is proportionate, while independent entity, authorization, and contractual checks should be completed before sensitive submissions, advance payments, or high-value project commitments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Signals weighed against the site

- AbuseIPDB: 15 reports on hosting IP 198.49.23.145 (Squarespace, Inc., Content Delivery Network), 70% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of antuenergia.cl.

- The request stayed on antuenergia.cl. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2017-06-23. CLEAR
- It is hosted on SQUARESPACE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about antuenergia.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
