## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

ANYMARKET is a corporate subscription-SaaS platform for marketplace operations, presenting a hub that connects sellers and retailers to more than 150 marketplaces while offering automation, AI-assisted enrichment, product and order synchronization, inventory and pricing controls, managed migration, case studies, and demo requests.

### Scam/Impersonation Risk

No contradictions were observed: the reviewed material contains no blacklist or phishing indication, no suspected brand impersonation, and no conflicting legal identities. The site's stated commercial model is coherent with its presentation as a marketplace-integration service, and behavioral review found no hidden forms, externally submitted password forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts. Some externally directed requests and posts were observed during browsing, but these were attributed to ordinary site behavior rather than an abuse pattern, and the overall page assessment identified no fraud indicators.

#### EVIDENCE

- The homepage presents a consistent ANYMARKET marketplace-integration proposition, with product features, customer cases, social links, and contact or demonstration prompts.
- The site's transport encryption is a valid DV certificate issued by YR2, expiring 2026-10-29.
- The domain was registered on 2013-09-23 and is approximately 12.89 years old.
- Historical records show 232 archive snapshots from 2015-05-05 through 2026-06-24, spanning 12 tracked years.

### Regulatory Verification Notes

The site includes dedicated About, Contact, Privacy Policy, Terms and Conditions, pricing, and support-related paths, providing a substantive corporate and commercial presentation. The available material supports an apparently legitimate SaaS business, but the real-world operator identity is not independently verified as conclusively connected to the ANYMARKET brand. The reviewed pages do not present a regulatory license number or formal authorization; for a marketplace-integration provider this is a disclosure and applicability question rather than evidence of criminal activity. The registration record names DB1 GROUP HOLDING LTDA, which should be reconciled independently with the operating entity and contractual counterparty.

#### EVIDENCE

- The site navigation exposes `/sobre`, `/contato`, `/politica-de-privacidade`, and `/termos-e-condicoes`, alongside plans and integration information.
- The registration record lists DB1 GROUP HOLDING LTDA as the domain owner.
- The site is hosted on AS31898, identified as ORACLE-BMC-31898 — Oracle Corporation, US.
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-29.

#### What to Verify Next

Before credential or payment interactions, the prospective counterparty should independently confirm that the contracting entity named in the commercial documents is the same entity associated with the ANYMARKET service. Applicable corporate, software-service, data-protection, and marketplace-partner obligations should be checked with the relevant official sources, while the Terms and Conditions should be reviewed for service scope, liability, cancellation, data handling, and support commitments. Official contact channels should also be confirmed through an independent route, and payment-protection arrangements should be established before any paid engagement.

#### EVIDENCE

- The homepage provides a demo-request path rather than an unexplained investment or financial-return solicitation.
- The Contact page and company-information paths provide the appropriate locations for confirming the commercial counterparty.
- The Terms and Conditions and Privacy Policy provide the primary documents for contractual and data-handling review.

#### Summary Verdict

The website presents a **high-trust, low-risk posture** and is evidence-consistent with an established, apparently legitimate enterprise SaaS service. No scam, phishing, impersonation, or identity-conflict indicators were identified, although the operator's real-world identity remains a matter of independent confirmation rather than proof established by this assessment.

#### Infrastructure Integrity

The site resolves through Oracle Corporation hosting in the United States, with no CDN edge layer detected and a directly identified hosting endpoint. The infrastructure is attributable and conventionally hosted; the provider classification is a mitigating technical signal, not independent proof of business legitimacy.

#### Closing Assessment

Normal business evaluation is proportionate, provided that ordinary independent checks of the contracting entity, applicable terms, and payment protections are completed before credentials or payments are submitted.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 79/100 |
| Identity verification confidence | 78%    |

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of anymarket.com.br.

- The request stayed on anymarket.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-37.com, across 4 name servers. NOTED
- The registration is paid up to 2027-09-23. NOTED
- The earliest public archive of this site is from 2015-05-05. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about anymarket.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
