

Is ao-sky.com a scam? TrustSniffer's high-risk assessment: 0/100

ao-sky.com

Verdict

0

OUT OF 100

CRITICAL RISK

ao-sky.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

A minimal 'Under construction / Coming soon' landing page with placeholder text and no forms, links, or monetization.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

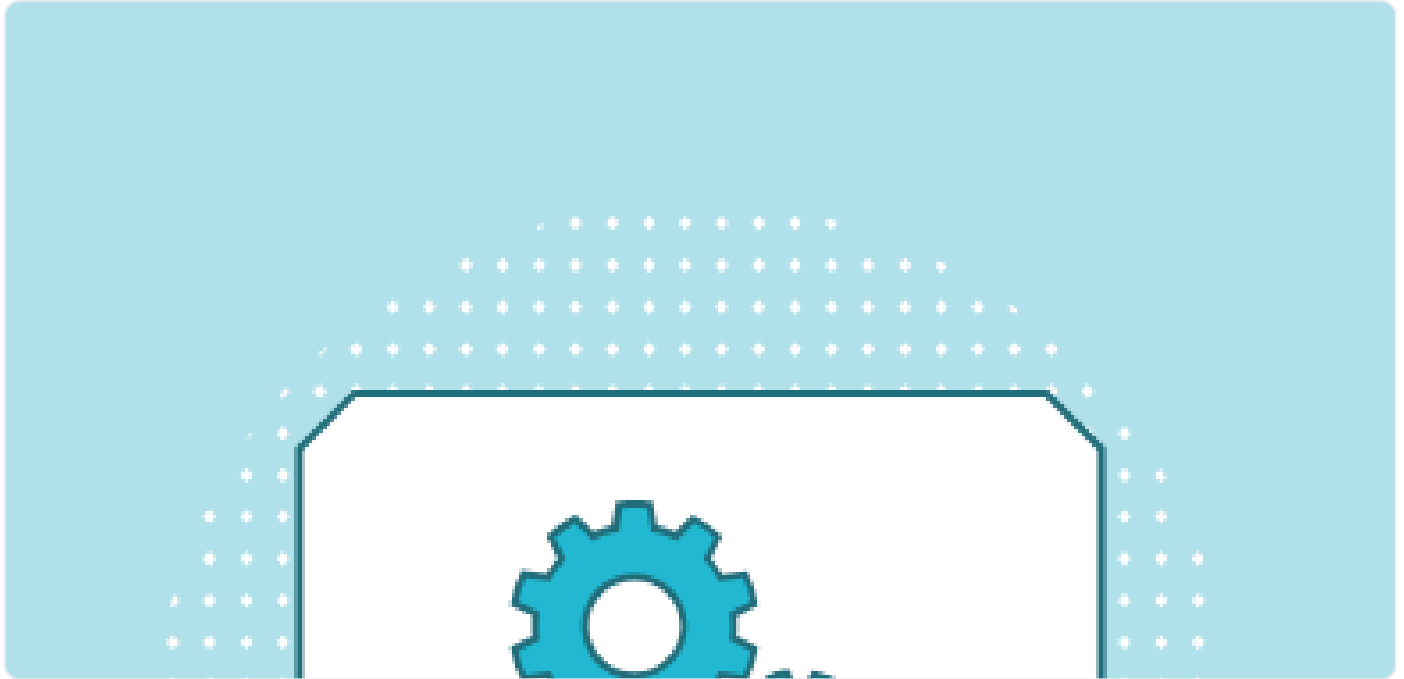

At a glance

The checks that decide most of this verdict.

Malware engines	5 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	20 years old Registered history	CLEAR
Web archive	Archived since 2008 421 snapshots	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

<https://ao-sky.com/>

What ao-sky.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal “under construction” landing page presenting placeholder text that an “Awesome Site” is being developed at the web address, with no visible product, service, payment flow, or stated operating purpose.

Scam/Impersonation Risk

External reputation evidence creates a **critical interaction risk** despite the benign appearance of the homepage. Multiple external security detections and confirmed blacklist records are associated with the domain, including a high-severity detection from a tier-one security provider. The page itself contains no login form, payment mechanism, wallet connection, impersonated brand, or other visible abuse pattern; however, its limited content cannot explain or neutralize the external threat findings. No conflicting legal-entity names were observed, and no on-page brand impersonation was identified.

EVIDENCE

- The homepage is an under-construction placeholder containing no forms, links, interactive elements, or monetization.
- External reputation assessment recorded 5 malicious detections and 1 suspicious detection across 11 evaluated results, with a tier-one security vendor flag.
- The domain is blacklisted by external reputation sources.
- Domain registration continuity shows registration on 2006-03-30 and an age of 20.41 years; the registrar is TUCOWS.COM, CO.

Regulatory Verification Notes

The available page does not provide a business description, legal-entity identification, licensing statement, registration number, terms, or other regulatory disclosure. This is a verification gap rather than independent proof of misconduct, but it prevents the site's operating model or responsible entity from being established from the website itself. Identity verification remains unconfirmed. A separate broker-reputation dataset returned no matching broker record, which is only contextual and does not establish licensing or regulatory standing.

EVIDENCE

- The homepage title and body identify only an "Under construction" project and provide no legal or regulatory information.
- Web-archive records show 421 snapshots spanning 2008–2026, with 19 years tracked; this establishes historical presence but does not identify the current operator.
- The site's transport certificate is issued by YR1, uses DV validation, and is valid to 2026-11-12.
- The website resolves through AS15169, operated by Google LLC, US.

What to Verify Next

Before any sensitive interaction, an institution should obtain the operator's legal name and independently confirm it through an authoritative corporate or regulatory registry relevant to the intended service. Any future licensing claim should be checked directly with the named regulator, while contact and ownership details should be confirmed through an independent offline channel rather than relying solely on information later published on the site. Until those checks are completed and the external reputation issue is resolved, activity should remain limited to passive observation.

EVIDENCE

- The current homepage provides no operator identity, service description, licensing claim, or registration number to validate.
- The available material contains no login, payment, or account-recovery workflow that can be independently tested.
- The domain's external blacklist status requires resolution before sensitive use can be reassessed.

Summary Verdict

The website has a **critical trust posture** and should not be treated as suitable for sensitive interaction. Its benign placeholder page and established technical history are outweighed by confirmed external threat detections and blacklist records, while the responsible operator remains unverified.

Infrastructure Integrity

The site is hosted on Google Cloud infrastructure and resolves to a Google-operated address, with no CDN or edge-IP layer identified. This is a technically conventional hosting arrangement, but it is only a mitigating infrastructure observation and does not establish legitimacy or offset the external reputation risk.

Closing Assessment

Sensitive actions should be deferred unless independent identity, regulatory, and reputation checks produce a clear and documented resolution.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ao-sky.com.

- The request stayed on ao-sky.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by siteground.net, across 2 name servers. NOTED
- The registration is paid up to 2028-03-30. CLEAR
- The earliest public archive of this site is from 2008-02-09. CLEAR
- It is hosted on GOOGLE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ao-sky.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
