Full analysis

Overview

The website is APAR (Asociația Pentru Antreprenoriat din România), an apparently established Romanian nonprofit association presenting entrepreneurship support, EMPRETEC training, events, membership, volunteering, partnerships, and community resources. Its apparent operating model is membership- and program-driven, with potential support from paid activities, sponsors, grants, and event participation.

Scam/Impersonation Risk

No contradictions were observed. The homepage and associated organizational pages present a coherent nonprofit and educational purpose, with no detected phishing, brand-impersonation, credential-harvesting, cryptocurrency, or financial-scam indicators. A login form is present, but the available page analysis found no sensitive form, hidden form, untrusted submission destination, or wallet-related behavior. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies the site as an organization or association and describes EMPRETEC training, entrepreneurship support, events, membership, and resources.
- The contact, membership, privacy, and cookie pages are linked within the site; the membership form is not classified as a sensitive form.
- The domain was registered on 2007-09-07 and is approximately 18.96 years old.
- Historical records show 118 archive snapshots spanning 2008–2026, with 19 years tracked.

Regulatory Verification Notes

APAR's content is framed as nonprofit, educational, and community activity rather than as a regulated financial service. No licensing claim or license number is identified in the supplied site analysis, so any statutory registration, charitable status, or program-specific authorization remains a transparency item for ordinary due diligence rather than evidence of deception. The site links Facebook and Instagram profiles, and no adverse broker-reputation match or external malicious classification was identified. The operator's identity should still be treated as apparent rather than independently proven.

EVIDENCE

- The homepage and project pages describe programs, training, events, membership, volunteering, and sponsorship or partnership opportunities.
- The site links Facebook and Instagram accounts and provides a dedicated contact page.
- The domain registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-09-19.

What to Verify Next

Before credential or payment interactions, independently confirm the association's legal name, current contact channels, membership terms, refund or cancellation conditions, and the payment-protection arrangements applicable to any paid program or event. For institutional engagement, confirm any claimed registration or authorization directly with the relevant Romanian registry or program authority and validate the organization through an independently sourced contact route.

EVIDENCE

- The site provides dedicated pages for about, projects, news, events, contact, membership, privacy, and cookies.
- The stated business model involves membership, training, events, sponsorships, partnerships, grants, and related community services.
- The site uses WordPress and presents two forms: login and membership signup.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, while operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by SPACE-AS - Space Ro SRL in Romania, without a detected CDN or WAF layer. This provides identifiable hosting context but fewer intermediary protective controls; it is a mitigating technical observation only and does not establish legitimacy.

EVIDENCE

- Hosted on AS50939 (SPACE-AS - Space Ro SRL, RO), with server IP 45.134.160.87.
- The site's TLS certificate is issued by YR1, uses DV validation, and expires on 2026-09-19.

Closing Assessment

Ordinary browsing is proportionate to the available evidence; account or payment activity should follow independent confirmation of the association's identity, applicable terms, and payment protections.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about apar.biz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
