

Is apollodesigner.com.br a scam? TrustSniffer's high-risk assessment: 0/100

apollodesigner.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

apollodesigner.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A simple hosting placeholder page (apollodesigner.com.br) indicating the site is not yet populated. No forms, links, or business claims are present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

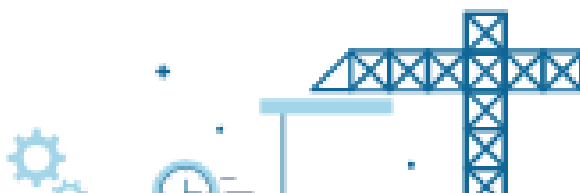

Malware engines	11 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	8.0 years old Registered history	CLEAR
Web archive	Archived since 2018 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE1	NOTED

apolloedesigner.com.br

Something amazing will be constructed here...

What apolloedesigner.com.br served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a parked placeholder for apolloedesigner.com.br rather than an operating business site. It presents the message “Something amazing will be constructed here...” alongside a standard hosting notice, with no visible service description, commercial proposition, or requested user action.

Scam/Impersonation Risk

Confirmed external security contradictions materially outweigh the otherwise inactive presentation. The domain is reported as blacklisted by the evaluated sources, with malicious detections including signals from Fortinet and Sophos; this supports a clearly cautionary posture for sensitive interaction. No identity contradiction or brand impersonation was observed in the available page content, and the placeholder page contains no login form, payment flow, or credential request, but the absence of an active transaction surface does not neutralize the external threat findings. The site's historical provenance is also not sufficient to establish current legitimacy.

EVIDENCE

- External reputation telemetry recorded 11 malicious detections and 1 suspicious detection; Fortinet and Sophos were among the flagged vendors, and blacklist findings were recorded by VT and an external blacklist source.
- Historical telemetry recorded 86 archive snapshots spanning 2018–2023, with 6 years tracked.
- The homepage contains approximately 210 characters of placeholder text, no forms, no internal or external links, and no financial or service claims.

Regulatory Verification Notes

The available site does not provide an operating legal, licensing, or corporate disclosure context. Its legal and regulatory status is therefore unverified rather than established. The named domain registrant in the registration record should not be treated as proof that the person or entity operates the website, particularly because independent identity verification is incomplete. A valid transport certificate confirms encrypted delivery, not authorization, ownership, or regulatory standing.

EVIDENCE

- Registration telemetry records creation on 2021-06-16, an age of approximately 5.18 years, and expiration on 2027-06-16.
- The site is hosted on AS53107, identified as EVEO S.A., BR.
- TLS telemetry records issuer YE1, DV validation, and validity through 2026-09-27T14:11:40+00:00.

What to Verify Next

Before any future sensitive use, an independent corporate-registry search should confirm the legal entity associated with the domain and establish an independently sourced contact route. If the site later offers regulated services, any claimed authorization should be checked directly against the relevant regulator's register using the confirmed legal entity and authorization details. A fresh independent reputation and malware assessment should also be obtained before the site is used for login, credential submission, downloads, or financial activity.

EVIDENCE

- The homepage provides no legal, licensing, or operator-identification material against which a registry record could currently be matched.
- The current page is a parked or coming-soon state, so any later change to services, forms, downloads, or payment functionality should be assessed as a new interaction surface.
- The available behavioral telemetry recorded 2 successful observation runs and 2 external XHR requests, both identified as non-whitelisted.

Summary Verdict

The overall posture is critical and unsuitable for trust-sensitive engagement. Available evidence supports treating the site as an unverified and externally flagged domain rather than as an established operating

business. The current lack of interactive functionality limits immediate exposure but does not support a positive legitimacy determination.

Infrastructure Integrity

The domain resolves directly to a single likely origin hosted by EVEO S.A., with no detected CDN or WAF layer and no separate edge-IP posture. This infrastructure provides limited defensive mitigation and should not be interpreted as evidence of legitimacy.

Closing Assessment

Prospective users should keep interaction read-only and refrain from login, credential, download, or financial activity unless the site's operator, purpose, and security standing are independently re-established.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of apollodesigner.com.br.

- The request stayed on apollodesigner.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by net.br, across 2 name servers. NOTED
- The registration is paid up to 2027-06-16. NOTED
- The earliest public archive of this site is from 2018-08-04. CLEAR
- It is hosted on AS53107, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about apollodesigner.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
