What apollopharmacy.in served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Apollo Pharmacy is an online retail pharmacy and healthcare marketplace presenting prescription and over-the-counter medicines, health products, supplements, lab tests, doctor consultations, membership services, credits, and fast home-delivery claims. Its apparent business model is to generate revenue through product sales, healthcare service fees, and membership or credit offerings.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent healthcare-commerce model rather than an anomalous or unrelated service, with established navigation for medicines, lab tests, doctor consultations, health records, and account functions. The available reputation checks found no malicious or suspicious detections, no phishing or impersonation indicators, and no confirmed blacklist signal. The combination of substantive commercial content, stable page behavior, and a strong public traffic footprint is consistent with an established site, although it does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage lists medicines, personal-care products, baby-care goods, supplements, health accessories, lab tests, doctor consultations, memberships, and home delivery.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no Google Safe Browsing or external blacklist hit for the site.
- The domain was registered on 2005-02-16 and is approximately 21.51 years old, with registration extending to 2030-02-16.
- The site's behavioral analysis recorded no hidden forms, password-exfiltration forms, wallet activity, clipboard hijacking, cloaking, or brand-impersonation indicators.

Regulatory Verification Notes

The evidence supports an apparently legitimate healthcare-commerce presentation, but the real-world operator identity remains independently unverified. The available page analysis does not identify a claimed license authority or license number, and the on-page disclosure state is unclear; this is a regulatory and transparency matter requiring confirmation rather than evidence of a scam. The site is not classified as a regulated financial entity, and the absence of a broker-dataset match is only contextual reputational information, not a licensing determination.

EVIDENCE

- The homepage identifies the business function as an online medical store and healthcare marketplace, with medicines, lab tests, and doctor consultations as principal services.
- The domain is served from AS396982, Google Cloud Platform, Google LLC, United States.
- Transport encryption uses a DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid through 2027-01-16.
- The available licensing fields contain no claimed license authority or license number, while the operator identity-verification status is unverified.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the merchant's legal identity, applicable pharmacy and healthcare authorizations, delivery and returns terms, refund process, and payment-protection arrangements. Contact and support channels should be confirmed through an independently sourced route rather than relying solely on information presented within the site.

EVIDENCE

- The homepage exposes login, search, and checkout functions and offers membership, credit, and healthcare-service features.
- The site's stated model includes prescription medicines, lab testing, and doctor consultations, making confirmation of the applicable authorization framework material to any procurement or partnership review.
- The page analysis found one form and no untrusted form destination or sensitive external form submission.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary browsing and site use. No scam, phishing, impersonation, or other contradictory signal was identified, but the conclusion should not be treated as independent proof of the operator’s real-world identity.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed address was a CDN edge address rather than an exposed origin address. This provides a meaningful protective layer against direct origin exposure, but it remains a mitigating infrastructure characteristic rather than proof of business legitimacy.

Closing Assessment

Normal use is proportionate to the available risk assessment, subject to ordinary independent checks of merchant identity, service terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of apollopharmacy.in.

- The request stayed on apollopharmacy.in. It was not redirected to another domain. CLEAR
- Registration is published under https://www.101domain.com/. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-02-16. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about apollopharmacy.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
