### Overview

Apostilas Opção is an established Brazilian educational e-commerce website selling exam-preparation apostilas, courses, question banks, mind maps, and related materials for public-service and professional examinations, supported by customer service, delivery policies, discounts, and an affiliate program.

### Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or identity-contradiction signals were observed. The site's commercial purpose is coherent with its visible catalog, support functions, cart, returns process, and student area, while external reputation checks found no malicious or suspicious detections. The domain's long operational history and continuous archival presence further support provenance rather than a recently created or repurposed storefront.

- Domain registration: 2001-04-03; approximately 25.35 years old, with expiry on 2028-04-03.
- Web archive: 681 snapshots spanning 2001–2026, covering 26 years with a maximum observed gap of 1 year.
- The homepage presents a consistent educational-commerce model, including apostilas, courses, questions, mind maps, student access, orders, support, and returns.

### Regulatory Verification Notes

The site presents itself as an educational retailer rather than a regulated financial service and does not display a specific regulatory license or license number in the supplied content. That is a transparency and scope note, not evidence of fraud. Its published purchase, delivery, exchange, privacy, customer-support, and affiliate sections provide a practical operating framework, and no adverse broker-reputation match was identified.

- The homepage identifies products for named examinations and organizing bodies across Brazilian states.
- The site navigation includes “Central de Atendimento,” “Dúvidas Aquisição e Entrega,” “Política de Troca e Devoluções,” and “Afiliados / Parceiros.”
- Hosted on AS14061 (DigitalOcean, LLC, US).
- TLS certificate issued by YR2 using DV validation, valid to 2026-10-19.

### What to Verify Next

Before a material purchase, the prospective customer should confirm the merchant details shown at checkout, review the applicable delivery and returns terms, and independently confirm the official support and payment

channels through the site's own navigation.

- The homepage provides direct paths to cart, orders, customer service, and acquisition and delivery information.
- The site exposes a dedicated exchange-and-returns policy.
- The site provides an affiliate-partner section and student-account functionality.

Summary Verdict

The website presents a legitimate, established, and trustworthy posture for its stated educational-commerce purpose. Normal interaction, including account login, purchasing, and standard account activity, is appropriate.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed traffic resolving through a single edge address, 165.227.82.78, on DigitalOcean's AS14061; the origin server was not observed. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not by itself proof of legitimacy.

Closing Assessment

Standard use is appropriate, with ordinary commercial checks such as retaining order confirmations and reviewing the applicable purchase terms.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about apostilasopcao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
