

Is appleguyza.co.za legit? TrustSniffer's high-trust assessment: 100/100

appleguyza.co.za

Verdict

100

OUT OF 100

HIGH TRUST

appleguyza.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

South African online retailer offering new and certified pre-owned Apple products, trade-ins, repairs, delivery, warranties, and several conventional payment methods. The page provides phone numbers, email, operating hours, pickup locations, pricing, and return terms. No clear phishing or investment-scam behavior is evident in the supplied content.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a South African consumer-electronics storefront selling new and certified pre-owned Apple devices and accessories, supported by device trade-ins, repairs, delivery, warranties, and conventional retail payment options.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The storefront presents coherent retail inventory—including discounted certified pre-owned iPhone models—rather than investment, cryptocurrency, or credential-harvesting propositions. Promotional language such as “limited stock” and “hurry up” is conventional sales urgency and is not accompanied by deceptive browser behavior, concealed forms, or suspicious transaction mechanics.

- The homepage identifies itself as “Apple Guy” and presents priced, cart-enabled inventory rather than claiming to be Apple’s official corporate website.
- External threat screening recorded 0 malicious and 0 suspicious determinations, with no reported phishing or signature matches.
- The domain was registered in 2020 and is approximately 6.01 years old; its registration is current through 2027-07-30.
- The web archive contains 20 snapshots spanning 2022-05-07 to 2026-03-13, covering 5 tracked years without detected repurposing or semantic drift.

Regulatory Verification Notes

The available registration record identifies Sucasa Investments CC, while the supplied storefront content does not establish whether that entity name is reproduced in formal website legal disclosures. No regulated financial or investment service is offered, and the absence of a financial-services licence claim is therefore not inherently adverse for this conventional retail model. The site’s operational identity, established history, stable behavior, and clean external reputation collectively support its legitimacy; the limited page-authority signal affects discoverability, not the trust conclusion.

- The domain-registration record names Sucasa Investments CC and DIAMATRIX C.C. as registrar.
- The homepage describes card, EFT, instalment-payment, and cash options for ordinary product purchases.
- The site is served from AS327979 (DIAMATRIX C.C - DIAMATRIX C.C, ZA).
- The site’s transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-09-29.

What to Verify Next

For procurement or higher-value purchases, the purchasing entity should confirm that the legal name on the invoice and payment instructions matches the registered business identity. Product-specific checks should establish the certified pre-owned device grade, warranty scope, return eligibility, and trade-in valuation before payment. Collection addresses and delivery arrangements should be confirmed through the storefront’s published channels when fulfilment timing is material.

- The homepage publishes telephone and email contact channels, operating hours, and South African pickup locations.
- The storefront provides device trade-in, repair, delivery-tracking, warranty, shipping, and return information.
- The homepage displays product prices in South African rand and provides standard cart and checkout functionality.

Summary Verdict

The website is a legitimate, established, and trustworthy ecommerce operation with no observed contradictions or material threat indicators. Its identity, historical continuity, substantive storefront content, and clean technical behavior converge on a high-confidence trust posture. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin address in South Africa and does not use a detected CDN or WAF edge layer. Direct origin visibility offers less network-layer shielding than a CDN-backed architecture, but the identified hosting environment is stable and presents no associated abuse signal in the supplied evidence.

Closing Assessment

Prospective customers may use the site normally, applying routine ecommerce safeguards such as retaining order documentation and confirming fulfilment terms for material purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of appleguyza.co.za.

- The request stayed on appleguyza.co.za. It was not redirected to another domain. CLEAR
- Registration is published under DIAMATRIX C.C.. CLEAR
- DNS for this domain is served by tld-ns.net, across 4 name servers. NOTED
- The registration is paid up to 2027-07-30. NOTED
- The earliest public archive of this site is from 2022-05-07. CLEAR
- It is hosted on DIAMATRIX C.C, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about appleguyza.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
