What applesandorangesng.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the website for Apples & Oranges Total Body Therapy, a Nigeria-based salon and day spa offering massages, waxing, facials, salon services, club membership, product sales, and online reservation and contact pathways. It presents itself as a one-stop family wellness business serving local customers through in-person appointments and related retail services.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and technical checks: there were no phishing indicators, brand-impersonation findings, malicious classifications, or confirmed abuse signals. The homepage's claim that the business is the "first salon and Day Spa in Nigeria" is an unverified marketing superlative, but it is not by itself evidence of impersonation or fraud. The site contains no login form, hidden sensitive form, wallet interaction, or apparent credential-harvesting mechanism, and its content is consistent with a local salon business.

EVIDENCE

- The homepage identifies Apples & Oranges as a total-body-therapy salon and day spa and provides service-booking calls to action; no phishing or impersonation indicator was detected on the page.
- The domain was registered on 2012-07-11 and is approximately 14.12 years old.
- Historical records show 81 archive snapshots spanning 2013–2026, covering 14 years tracked.

Regulatory Verification Notes

The About Us, Services, Club Membership, and Contact Us pages present a coherent commercial service model, but the reviewed site does not disclose a license, registration number, or clearly stated legal operating entity. For a local salon, this is a transparency item requiring ordinary business verification rather than evidence of a scam. The available external reputation context contains no matching broker warning, and the site's technical identity is consistent across its domain, certificate, and hosting records. The operator's real-world identity remains apparently legitimate but not independently verified.

EVIDENCE

- The domain registrar is Quantum Names LLC; registration is shown through 2027-07-11.
- The site is served from AS13335 (Cloudflare, Inc., US).
- The TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-10.
- The About Us and Contact Us pages provide business-facing information but do not state a license or registration number.

What to Verify Next

Before credential or payment interactions, an interested customer should independently confirm the operating business and any locally required salon or business registration through an official source. The booking and contact processes should also be checked for clear cancellation, refund, appointment, and payment-protection terms, with official contact channels confirmed through an independent route where practical.

EVIDENCE

- The About Us and Contact Us pages are the relevant locations for confirming the stated business identity and operating details.
- The booking pathway is the relevant location for reviewing appointment terms, cancellation conditions, and any payment requirements.
- The site links to Instagram and TikTok profiles that may assist with independent continuity checks for the business presence.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate website presenting a low-risk local service operation. Its high-trust posture is supported by coherent site content, long-running domain continuity, clean available reputation signals, and stable technical infrastructure, while the operator's real-world identity is not independently proven.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN and WAF, with observed addresses belonging to Cloudflare edge infrastructure and no origin address exposed in the analysis. This arrangement mitigates direct origin exposure and supports infrastructure resilience, but it is a protective control rather than proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate; independent checks of the business identity, booking terms, and payment protections should be completed before submitting credentials or making a payment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of applesandorangesng.com.

- The request stayed on applesandorangesng.com. It was not redirected to another domain. CLEAR
- Registration is published under Quantum Names LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-11. NOTED
- The earliest public archive of this site is from 2013-03-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about applesandorangesng.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
