

# Is aptus.co.tz legit? TrustSniffer's high-trust assessment: 90/100

aptus.co.tz

## Verdict

90

OUT OF 100

HIGH TRUST

aptus.co.tz appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Aptus Solutions appears to be a Tanzanian ISP and web services company offering connectivity, hosting, VPS, BulkSMS and VoIP solutions. Contact phone and service lists are visible; no payment flows, high-yield claims, or credential-harvesting elements are present in the provided DOM text.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

Aptus Solutions is a Tanzanian internet service and web-services company presenting business and consumer offerings that include internet connectivity, web hosting, VPS and dedicated servers, domain registration, BulkSMS, VoIP, private APN, and application development. Its homepage presents a conventional corporate-services model based on paid connectivity, hosting, telecom, and related technology services.

### Scam/Impersonation Risk

No scam, phishing, blacklist, or brand-impersonation contradictions were observed. The homepage describes a coherent ISP and hosting business, provides a telephone contact, and contains no visible high-yield investment claims, payment-flow abuse, credential-harvesting elements, or crypto-related mechanisms. External reputation checks were clean, supporting a low apparent scam and impersonation risk; however, the available evidence does not independently verify the real-world operator behind the site.

#### EVIDENCE

- Homepage: presents Aptus Solutions as a Tanzania-based ISP and hosting provider with identifiable service categories and a published telephone contact.
- Homepage and observed site behavior: no phishing indicators, hidden sensitive forms, wallet-drainer activity, or brand-impersonation signals were detected.
- External reputation telemetry: no malicious or suspicious detections, no Google Safe Browsing warning, and no blacklist hit were recorded.
- Domain registration record: registered 2009-07-27 and approximately 17.05 years old.

### Regulatory Verification Notes

The site's legal and identity presentation is consistent with a professional operating business: the homepage and About section identify "Aptus Solutions Ltd," and the footer displays a company copyright notice. The available evidence does not independently verify the operator's real-world identity, and the visible material does not establish a regulatory license or registration number for the connectivity and telecommunications services; this is a verification gap rather than evidence of a scam. No matching third-party broker signal was identified. The site uses a valid domain-validated TLS certificate, while the long registration history and identified registrar provide additional evidence of an established web presence.

#### EVIDENCE

- Homepage/About content: identifies “Aptus Solutions Ltd” and describes internet, hosting, messaging, VoIP, and application-development services.
- Domain registration record: registrar REG-APTUS; creation date 2009-07-27T07:52:07Z; expiration date 2029-07-26T21:00:00Z.
- Site transport encryption: TLS certificate issued by YR2, validation level DV, valid to 2026-09-24T19:35:12+00:00.
- Legal and service-page review: no license authority or license number was stated in the supplied content.

#### What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal counterparty and the applicable Tanzanian business or telecommunications authorization through the relevant official registry. Service customers should also obtain the governing service terms, cancellation or termination conditions, support obligations, and payment-protection arrangements directly from an independently confirmed company channel. Any account onboarding should be limited to the information necessary for the selected service, with billing details checked against the agreed contract.

#### EVIDENCE

- About and contact pages: use the stated company identity and contact details as the starting point for an independent counterparty check.
- Service pages: request written terms covering the selected connectivity, hosting, messaging, or voice service before commitment.
- Account and billing areas: confirm that payment instructions and support channels correspond to the independently verified provider.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. No contradictory scam or impersonation signals were observed, although the operator’s real-world identity remains independently unverified; legitimacy should therefore be treated as apparent rather than proven.

#### Infrastructure Integrity

The site resolves directly to infrastructure operated by Aptus Solutions Ltd in Tanzania, with no CDN or WAF detected and two likely origin addresses identified. Direct hosting provides a clear technical association with the named service provider, while the absence of an intermediary protective layer means infrastructure protection should be regarded as limited rather than as proof of legitimacy.

#### EVIDENCE

- Hosting infrastructure: served from AS37349, Aptus Solutions Ltd - Aptus Solutions Ltd, TZ, in Tanzania.
- Network resolution: 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses; CDN not detected.

## Closing Assessment

Prospective users should complete ordinary independent checks of the counterparty, service terms, and payment protections before entering credentials or making payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of aptus.co.tz.

- The request stayed on aptus.co.tz. It was not redirected to another domain. CLEAR
- Registration is published under REG-APTUS. CLEAR
- DNS for this domain is served by co.tz, across 2 name servers. NOTED
- The registration is paid up to 2029-07-26. CLEAR
- It is hosted on Aptus Solutions Ltd, from a server in TZ. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about aptus.co.tz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
