

Is aquicardia.fr legit? TrustSniffer's high-trust assessment: 100/100

aquicardia.fr

Verdict

100

OUT OF 100

HIGH TRUST

aquicardia.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Aquicardia is a French supplier and service provider for automated external defibrillators, offering sales, maintenance and training since 2008. The site includes product and service sections, a blog, contact information and social links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.aquicardia.fr/>

What aquicardia.fr served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Aquicardia is a French ecommerce and service website for automated external defibrillators, related accessories, maintenance services, and first-aid and defibrillator training, with customer-account, ordering, contact, blog, and social-media functions supporting a medical-equipment supplier business model.

Scam/Impersonation Risk

No contradictions were observed. The site content presents a coherent corporate and ecommerce profile, and the page review identified no phishing, brand-impersonation, malicious-form, wallet, or cloaking indicators. One external reputation signal concerned the shared hosting address rather than Aquicardia's content or domain; this is a soft infrastructure-reputation signal and does not establish site-level abuse. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently proven.

EVIDENCE

- The homepage identifies Aquicardia as a supplier and service provider for automated external defibrillators, maintenance, accessories, hygiene products, and training; no fraud indicators were recorded on the reviewed pages.
- The domain was registered on 2016-09-27 and is approximately 9.9 years old.
- Historical coverage is recorded from 2018-01-14 through 2024-06-24 across 7 years.
- External screening recorded 10 abuse reports against shared infrastructure, with a confidence score of 13 and attribution to the hosting provider's shared IP environment.

Regulatory Verification Notes

Aquicardia's stated commercial activity is internally consistent with a medical-device and training supplier. The homepage claims operations since 2008, installation of several thousand defibrillators, maintenance for several hundred local authorities and businesses, and recurring first-aid training; these are substantive business claims but are not independently verified by the supplied evidence. No medical-device licence, registration number, or licensing authority is presented in the available site content, making regulatory status a transparency item for ordinary business verification rather than evidence of a scam. The site's identity is supported by its established commercial presentation and linked social presence, but operator identity remains only likely rather than independently verified.

EVIDENCE

- The homepage describes sales, maintenance contracts, emergency-support services, and paid first-aid and defibrillator training.
- The site links to Facebook, Twitter, LinkedIn, and Instagram.
- The site is hosted on AS16276, OVH - OVH SAS, France.
- Transport encryption uses a DV certificate issued by YE1, valid through 2026-10-11.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant's legal identity through an offline or independently sourced contact route, review the applicable purchase, delivery, warranty, maintenance, and return terms, and confirm the payment method's buyer-protection provisions. For institutional procurement, the relevant French medical-device and training obligations should also be checked against the supplier's formal documentation and the appropriate registry or contracting records.

EVIDENCE

- The site provides customer-account and ordering functions alongside contact and customer-support sections.
- The homepage describes maintenance, equipment deployment, regulatory-support, and training services that warrant documentary confirmation during procurement.
- The available page analysis found no sensitive form, hidden form, or untrusted form destination.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate business website. This conclusion supports normal browsing and ordinary commercial consideration, while remaining appropriately qualified because the operator’s real-world identity has not been independently verified.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed infrastructure associated with OVH - OVH SAS; the origin server was not observable in this analysis. This protective architecture is a mitigating security measure, not proof of legitimacy, and the shared-infrastructure reputation signal should be interpreted accordingly.

Closing Assessment

Proceed with ordinary independent merchant-identity, contractual, and payment-protection checks before submitting credentials or completing a purchase.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 10 reports on hosting IP 46.105.57.169 (OVH SAS, Content Delivery Network), 13% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aquicardia.fr.

- The request stayed on aquicardia.fr. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2028-09-27. CLEAR
- The earliest public archive of this site is from 2018-01-14. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aquicardia.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
