Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a corporate information site for M/s Arayaa Spintex (P) Ltd, presenting a cotton-yarn manufacturing business, its operating locations, company background, and commercial contact channels for domestic and international customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate purpose—manufacturing and selling 100% cotton open-end yarn—rather than soliciting investments, cryptocurrency transfers, unusually high returns, or sensitive credentials. The site has no login form, sensitive data form, wallet-connect functionality, or detected brand-impersonation indicators. Available external reputation checks identified no malicious or suspicious findings, and no broker-dataset match was recorded; these are supporting signals rather than proof of operator identity. The website therefore appears legitimate and low risk for its stated informational purpose, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage identifies M/s Arayaa Spintex (P) Ltd and describes the manufacture of 100% cotton open-end yarn for domestic and international customers.
- The homepage was observed without login forms, hidden forms, password submission destinations, wallet activity, or cryptocurrency-related content.
- Domain registration continuity: registered 2022-01-21; approximately 4.58 years old.
- Historical coverage records 34 archive snapshots spanning 2023–2026, with 4 years tracked.

Regulatory Verification Notes

The site provides a specific company name, registered-office, corporate-office, and factory information, which is consistent with a conventional business presence. No licensing claim or registration number is presented; for a yarn manufacturer, this is a transparency and commercial-verification matter rather than evidence of a scam. The available evidence supports an established, apparently legitimate corporate site, but does not independently verify that the online presence is operated by the named real-world entity. Transport security and hosting are technically sound, although a domain-validated certificate confirms control of the web domain, not legal ownership of the business.

EVIDENCE

- The company-information content identifies registered, corporate, and factory locations in Delhi and Burhanpur, Madhya Pradesh.
- The domain registrar is NAMECHEAP INC; the recorded registration date is 2022-01-21 and the expiration date is 2028-01-21.
- Served from AS16509, Amazon.com, Inc., US.
- TLS certificate issued by Amazon RSA 2048 M04, validation level DV, valid to 2026-11-12.

What to Verify Next

Before credential or payment interactions, an independent corporate-registry check should confirm the named entity and its current business status. Commercial counterparties should validate the published contact channels through an independently sourced route, confirm contractual delivery and return terms, and use payment arrangements that provide appropriate dispute or recovery protection.

EVIDENCE

- The site's corporate-information pages provide identifiable business locations suitable for independent registry and address checks.
- The contact content provides multiple telephone channels for out-of-band confirmation.
- The site is presented as a corporate informational presence rather than an online account or payment portal.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification is strong for normal

informational engagement, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure. All observed addresses were CDN edge addresses, and the origin server was not observable in the analysis; this reduces direct origin exposure and is a mitigating technical control, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the evidence; independent merchant-identity, contractual, and payment-protection checks should be completed before credentials or funds are committed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arayaaspintex.com.

- The request stayed on arayaaspintex.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by awsdns-11.org, across 4 name servers. NOTED
- The registration is paid up to 2028-01-21. CLEAR
- The earliest public archive of this site is from 2023-01-28. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arayaaspintex.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
