

Is arcdmarc.com a scam? TrustSniffer's high-risk assessment: 0/100

arcdmarc.com

Verdict

0

OUT OF 100

CRITICAL RISK

arcdmarc.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Chinese-language news/content page with editorial lists and links to other news pages, includes an age confirmation line and standard disclaimers. No forms or financial solicitations present in the captured HTML.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	13 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	2.8 years old Registered history	CLEAR
Web archive	Archived since 2023 Public history exists	CLEAR
Certificate	Encrypted connection Issued by R12	NOTED

What arcdmarc.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a Chinese-language editorial/news website presenting article lists, links to related news content, an age-confirmation prompt, and standard “as-is” disclaimers; its apparent business model is informational publishing supported by advertising, sponsorship, or institutional funding rather than direct user payments.

Scam/Impersonation Risk

The site presents no captured login form, payment form, financial solicitation, or direct credential-harvesting mechanism, and the page analysis did not identify brand impersonation or a conflicting legal identity. However, these benign page-level characteristics are outweighed by confirmed malicious detections and blacklist status from external reputation sources. The site should therefore be treated as unsuitable for login, credential submission, downloads, or financial interaction despite its editorial appearance. The age-gate behavior and substantial external request activity are additional reasons to avoid treating the visible content as sufficient evidence of safety. No confirmed brand impersonation was identified, but the confirmed blacklist signal constitutes a material contradiction to ordinary trust.

EVIDENCE

- External reputation assessment recorded 13 malicious and 2 suspicious detections across 20 evaluated results, with Fortinet and Sophos among the flagged vendors.
- The domain was identified in blacklist sources, while Google Safe Browsing returned no malicious result; this difference does not negate the confirmed blacklist finding.
- The captured homepage contained no forms, login form, hidden sensitive form, or wallet-connection execution.
- Archive telemetry records 24 snapshots across 3 tracked years, with recorded coverage from 2023-10-31 to 2025-01-05.

Regulatory Verification Notes

The visible site functions as an editorial page rather than a regulated financial service, and no license claim, license authority, or registration number is presented in the supplied content. That is a regulatory-disclosure gap rather than independent proof of fraud, but it leaves the operating entity and any applicable publishing or commercial permissions unconfirmed. The independently assessed identity status remains unverified. A valid domain-validated certificate and identifiable hosting do not establish legal ownership or regulatory standing. No matching broker record was identified in the supplied third-party broker context.

EVIDENCE

- The homepage title identifies “汕尾市觅思股份有限公司,” but the supplied page content does not independently establish that entity’s relationship to the domain.
- No license number, licensing authority, or regulatory registration claim was captured.
- Registration telemetry records 2025-11-18; the reconciled historical continuity age is 2.8 years.
- The TLS certificate is issued by R12 at DV validation level and expires 2026-08-25T18:00:24+00:00, with 5 days remaining.

What to Verify Next

Before any interaction beyond passive viewing, an independent registry or official corporate-records check should confirm the operator associated with the domain and whether the named organization is genuinely connected to it. If the site is intended to provide a regulated or commercially consequential service, the applicable authority should independently confirm authorization rather than relying on statements made on the website. Official contact channels should also be confirmed through an offline or independently sourced route.

EVIDENCE

- Identity verification is currently unverified, so the apparent organizational name should not be treated as proof of operation.
- The captured page is informational in form and does not provide a licensing reference that can be independently matched.
- The site's transport security confirms encrypted delivery, not operator identity, content safety, or regulatory authorization.

Summary Verdict

The overall posture is **critical risk**, driven by convergent external malicious detections and confirmed blacklist status despite the site's news-oriented presentation and absence of visible credential or payment forms. The website's apparent editorial purpose does not provide a sufficient basis for trust in sensitive interactions, and its real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than through a detected CDN or WAF, providing no protective edge layer to mitigate exposure. Hosting is associated with AS54600, PEG-SV - PEG TECH INC, US, and the observed server IP is 108.186.170.21; this infrastructure fact is neutral context and does not establish legitimacy.

Closing Assessment

Passive viewing is the only proportionate use described by the available evidence; account access, credential submission, downloads, and financial activity should be withheld unless the operator and purpose are independently validated.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk The public registration record for this domain is incomplete. Registration and ownership rule:KF_WHOIS_INCOMPLETE
02 Sensitive Interaction Risk - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor. Analysis engine signal:direct_threat - The page made background requests to destinations TrustSniffer does not recognise. Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR - The page exchanged network traffic with destinations TrustSniffer does not recognise. Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC - Most of what the page loaded came from other domains rather than from this one. Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it. External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arcdmarc.com.

- The request stayed on arcdmarc.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by arcdmarc.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-18. NOTED
- The earliest public archive of this site is from 2023-10-31. CLEAR
- It is hosted on PEG-SV, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arcdmarc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
