

Is archivoscrosoft.com a scam? TrustSniffer's high-risk assessment:
1/100

archivoscrosoft.com

Verdict

1

OUT OF 100

CRITICAL RISK

archivoscrosoft.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language 'coming soon' page with brief apologetic/placeholder text; no forms, links, or commercial claims.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

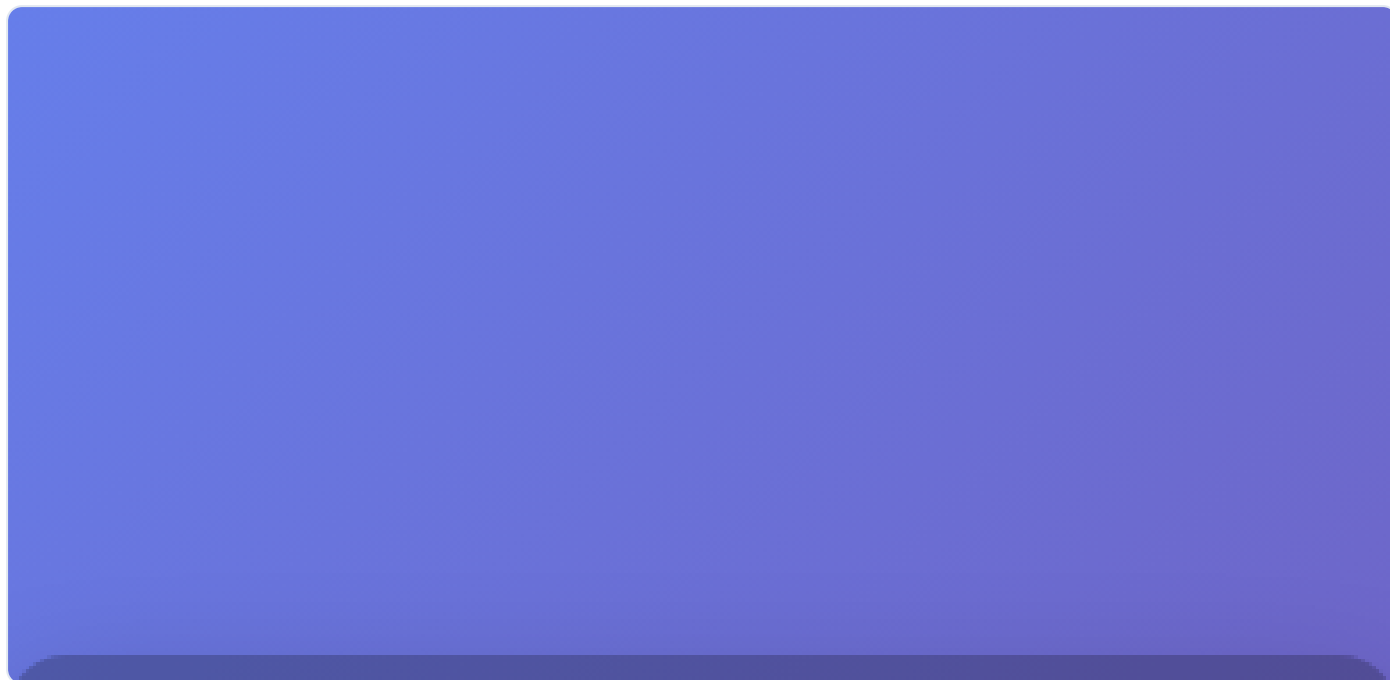

At a glance

The page as captured

<https://archivoscrosoft.com/>

What archivoscrosoft.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Spanish-language “coming soon” landing page presenting a short apology and construction notice rather than an active service, storefront, account portal, or financial offering. Its apparent purpose is to announce that a fuller website is being developed, but the current page provides no substantive business model or operational functionality.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence records a confirmed blacklist status and multiple malicious detections, despite the page itself being only a benign-looking placeholder. The available content does not show a login form, payment flow, credential request, or visible brand-impersonation mechanism, and no identity contradiction was observed on the page; however, those benign page characteristics do not offset the confirmed external threat signals. The domain is also very recently registered, while the published content is too limited to establish who operates it or why the domain has been

flagged. Sensitive interaction should therefore be treated as inappropriate unless the site is independently cleared.

EVIDENCE

- The homepage is a Spanish-language under-construction notice with no forms, links, commercial claims, or transaction functionality.
- External reputation checks recorded 17 malicious detections and 4 suspicious detections, with a confirmed blacklist status.
- The hosting IP was associated with 23 abuse reports; the attribution is to shared data-centre infrastructure rather than conclusively to the website operator.
- The registration record gives a creation date of 2026-03-11 and an age of 0.53 years; the registrar is NameSilo, LLC.

Regulatory Verification Notes

The available page does not claim a license, identify a regulated business, provide a registration number, or supply substantive legal, ownership, terms, or contact disclosures. This is a regulatory and transparency gap rather than, by itself, proof of fraud, but it prevents meaningful validation of the operator or any future service that may be launched. Identity verification remains unestablished. The valid transport certificate and identifiable hosting arrangement are technical characteristics only and do not constitute regulatory authorization or evidence of legitimate ownership.

EVIDENCE

- The homepage contains only a construction notice and provides no licensing, corporate, or regulatory disclosure.
- The site is served from AS202412, OMEGATECH-AS - Omegatech LTD, SC.
- TLS is issued by YR2 at DV validation level and is valid to 2026-12-17.

What to Verify Next

Before any future engagement, an independent party should establish the operator's legal identity and confirm any claimed authorization directly with the relevant official registry. Any later request for credentials, payment, account creation, software installation, or financial activity should remain suspended until the domain, operator, and service purpose have been corroborated through an independent offline channel. The site should also be reassessed if its placeholder page is replaced with operational content.

EVIDENCE

- The current homepage provides no documentary basis for validating an operator or regulated activity.
- The present site has no observable account, payment, or commercial workflow against which claimed ownership or authorization could be tested.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. Available evidence does not establish a trustworthy connection between the website and a legitimate real-world operator, while the confirmed external

threat indicators create a material contradiction to the otherwise minimal and non-operational page content.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by OMEGATECH-AS - Omegatech LTD, SC, with no detected CDN or WAF layer. This provides no additional protective edge service to mitigate exposure, and infrastructure characteristics should not be interpreted as evidence of legitimacy.

Closing Assessment

Treat the site as untrusted for login, credential submission, financial activity, downloads, or other sensitive engagement until independent identity, authorization, and security validation has been completed.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 23 reports on hosting IP 178.16.54.253 (OMEGATECH, Data Center/Web Hosting/Transit), 17% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of archivoscrosoft.com.

- The request stayed on archivoscrosoft.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by virtualine.org, across 2 name servers. NOTED
- The registration is paid up to 2029-03-11. CLEAR
- It is hosted on OMEGATECH-AS, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about archivoscrosoft.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
