Full analysis

Overview

This is an informational cultural archive dedicated to photographer Tomás Montero Torres, presenting historical articles, photography-related material, archival content, and a small merchandise offering involving prints, buttons, and handcrafted notebooks.

Scam/Impersonation Risk

Contradictions are present and materially affect the site's risk posture. The domain is reported as **blacklisted** by two external sources, with four malicious and one suspicious detections in the evaluated reputation results. This is a significant external threat signal even though the supplied page analysis found no overt brand-impersonation indicators, suspicious forms, or obvious high-risk financial flows. The apparent connection to the named archive is therefore not sufficient to establish that sensitive interactions are appropriate, and the real-world operator identity remains unverified.

EVIDENCE

- External reputation results recorded 4 malicious detections and 1 suspicious detection for the domain; the domain was also marked by 2 blacklist sources.
- The domain was registered on 2010-08-17 and is recorded as 16.02 years old.
- Archive intelligence records a tracked period from 2013-05-20 to 2026-05-19, spanning 14 years, while describing the archival coverage as sparse.
- The homepage analysis identified no login form, sensitive form, hidden form, or brand-impersonation indicator.

Regulatory Verification Notes

The site presents an archival and merchandise-oriented model rather than a financial-service proposition, but the available material does not establish a regulated legal entity or independently verified operator. No licensing authority or registration number is disclosed in the supplied site content; this is a transparency gap relevant to any commercial transaction, although it is not by itself evidence of a scam. The valid transport certificate and established registration history are technical or administrative facts, not proof of ownership, authorization, or regulatory standing.

EVIDENCE

- The site is hosted on AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- The site's TLS certificate is issued by YE2 with DV validation and is valid to 2026-09-24T22:52:35+00:00.
- Registration records identify GoDaddy.com, LLC as registrar, with an expiration date of 2027-08-17.
- The supplied page content describes merchandise purchases and inquiries but presents no licensing authority or registration number.

What to Verify Next

Before any purchase or provision of personal information, an independent party should confirm the operator's legal name, ownership of the archive, merchandise fulfillment arrangements, refund terms, and the intended payment recipient through contact details obtained outside the site. Any payment should use a method offering transaction dispute and buyer-protection mechanisms, and sensitive account credentials should not be reused or submitted.

EVIDENCE

- The homepage contains no on-site payment form and routes purchase-related activity through an external contact process.
- Browser testing recorded 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 password-external-form events.
- The site returned successfully in 2 of 2 recorded behavioral runs, but stable page delivery does not resolve the external reputation concern.

Summary Verdict

The overall posture is **low trust**, with a high risk of sensitive interaction. The site may be a genuine cultural archive in presentation and content, but the available evidence does not support treating its operator or transaction channels as sufficiently trusted for credentials, personal information, or financial activity.

Infrastructure Integrity

The site resolves directly through hosting infrastructure rather than a detected CDN, with five likely origin addresses and no edge addresses identified. This configuration provides less intermediary protection and leaves the hosting environment as the principal infrastructure context; infrastructure characteristics neither explain nor neutralize the adverse reputation findings.

Closing Assessment

Use should be limited to non-sensitive viewing unless independent operator and transaction verification is completed; login, credential submission, and financial activity should remain deferred.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about archivotomasmontero.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
