

Is archlc.com legit? TrustSniffer's high-trust assessment: 90/100

archlc.com

Verdict

90

OUT OF 100

HIGH TRUST

archlc.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

ARC Healthy Living Centre site providing information about the centre, its activities, facilities, events, contact details and volunteering; includes videos and social links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ARC Healthy Living Centre is an informational community-health website presenting the centre's activities, facilities, events, volunteering opportunities, resources, contact details, and multimedia tours. Its apparent business model is a non-profit community and wellbeing service sustained through local sponsorships, donations, events, and community programmes.

Scam/Impersonation Risk

No contradictions were observed across the supplied site content, technical checks, and reputation indicators: there was no phishing, impersonation, confirmed blacklist, malicious detection, or conflicting legal identity. One external reputation check returned a suspicious classification, but this was not accompanied by malicious detections or a confirmed blacklist and therefore remains a limited, unattributed reputational signal rather than evidence of fraud. The homepage's community-service presentation, named activities, events, facilities, volunteering information, and local contact details are consistent with the stated non-profit purpose. The site's operator identity remains likely rather than independently verified, so the on-site identity claims should not be treated as conclusive proof of the real-world entity.

EVIDENCE

- The homepage identifies “ARC Healthy Living Centre” and describes shared health and wellbeing services, community participation, volunteering, facilities, and scheduled events.
- Homepage analysis found no login form, hidden form, sensitive form, wallet connection, clipboard manipulation, or external password submission.
- External reputation results recorded 0 malicious detections, 1 suspicious classification, and no confirmed blacklist or phishing indicator.
- Historical records for the domain extend from 2013-04-19 to 2025-05-04, with 13 years tracked.

Regulatory Verification Notes

The available pages provide substantive operational information, including an About section, activities and facilities, events, resources, jobs, news, and contact functions. The homepage also includes a welcome from Jenny Irvine identified as CEO; this is an on-site representation, not independent verification of the operator's legal identity. No licensing authority, registration number, or formal regulatory status is presented in the supplied content. For a community health centre, the relevance of any licence or registration depends on the specific services offered, so this is a disclosure point for ordinary verification rather than an indication of scam activity. The domain's long registration history and valid transport encryption support an established-site assessment, while the identity linkage remains qualified.

EVIDENCE

- The domain was registered on 2008-02-27T11:32:10Z and has an observed age of 18.49 years; expiry is recorded as 2027-02-27T11:32:10Z.
- The site is served from AS34282, UKNOC-AS - Team Blue Carrier Limited, GB.
- The site's TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid to 2026-09-30T01:10:07+00:00.
- The homepage and navigation identify the centre, its activities, events, facilities, volunteering functions, and contact provisions, but do not display a licensing authority or registration number.

What to Verify Next

Before credential or payment interactions, an organisation considering engagement should independently confirm the centre's legal or charitable standing through the relevant local registry and establish which, if any, service-specific permissions apply. Contact details should be validated through an independent offline or institutional route, and any donation, booking, or payment process should be checked for clear beneficiary identification, payment protection, refund terms, and confirmation records. Site representatives should also confirm that current event and service information corresponds to the centre's active operations.

EVIDENCE

- The site provides dedicated About, Contact Us, Events, Jobs, and Resources sections that can be cross-checked against independent institutional records.
- The homepage presents a telephone contact, contact address channel, event listings, and volunteering information suitable for independent confirmation.
- The site uses one newsletter/contact-related form and does not expose a sensitive login or credential-collection form in the assessed content.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate community-service website. No scam or impersonation contradiction was identified, although the real-world operator connection is not independently verified and the classification carries meaningful evidentiary uncertainty.

Infrastructure Integrity

The site resolves directly to one identified hosting address rather than through a detected CDN or WAF service. This reduces the availability of an additional protective edge layer, but the infrastructure is resolved, attributable to a UK hosting provider, and supported by valid TLS; the hosting arrangement is therefore a mitigating technical factor, not proof of legitimacy.

Closing Assessment

Ordinary browsing and service-information use are proportionate, while credentials, donations, bookings, or other payments should follow independent identity, terms, and payment-protection checks before completion.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of archlc.com.

- The request stayed on archlc.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under 123-Reg Limited. [CLEAR](#)

- DNS for this domain is served by rapidswitch.com, across 3 name servers. NOTED
- The registration is paid up to 2027-02-27. NOTED
- The earliest public archive of this site is from 2013-04-19. CLEAR
- It is hosted on UKNOC-AS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about archlc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
