

Is argon-client.com safe? TrustSniffer's moderate-trust assessment: 50/100

argon-client.com

Verdict

50

OUT OF 100

MODERATE TRUST

argon-client.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-10-01 by automated analysis. Classification confidence 55%.

What this site appears to be

Page for Argon Client, an unofficial Meteor Client addon for DonutSMP. Describes 90+ modules (combat, base finding, render, DonutSMP-specific), provides downloads for Fabric builds, install steps, FAQ, and legal notice that it is unofficial.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://argon-client.com/

What argon-client.com served when TrustSniffer captured it on 2026-10-01. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Argon Client is an unofficial fan project that presents a free Minecraft mod for DonutSMP, built as an addon to Meteor Client and distributed through Fabric downloads, installation guidance, module documentation, and compatibility information.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity contradictions were observed. The homepage clearly identifies Argon Client as unofficial and describes its purpose, while the stated functionality—such as a fly bypass, auction-house sniper, base-finding tools, Crystal PvP macros, X-Ray, and storage- or player-tracking features—creates potential game-server terms-of-service and software-safety considerations, but is not itself evidence of impersonation or a scam. The site presents a free-download model with no sensitive form, payment flow, wallet connection, or obvious monetization. External reputation checks also returned no malicious or suspicious detections.

EVIDENCE

- The homepage identifies Argon Client as an unofficial Meteor Client addon for DonutSMP and describes its download and installation purpose.
- The homepage lists the advertised modules, including “Donut Bypass Fly,” “AH Sniper,” “Crystal Aura,” “X-Ray,” “StorageESP,” and “Coord Logger.”
- Observed browser behavior showed no external posts, external requests, hidden forms, clipboard writes, wallet activity, or cloaking; all three observed runs completed successfully.

Regulatory Verification Notes

This is a software-distribution site rather than a financial or regulated-services platform, so financial licensing is not indicated by the supplied content. Its legal notice appropriately presents the project as unofficial, but the available material does not independently verify the real-world operator behind the project. The registration record uses a privacy service and a generic administrative designation; this is an administrative identity limitation rather than an identity contradiction. The page provides substantive product, compatibility, installation, FAQ, changelog, credits, and legal information, although independent operator and software-provenance details remain areas for verification.

EVIDENCE

- The legal notice and homepage describe the project as unofficial rather than presenting it as an official Meteor Client or DonutSMP service.
- The domain was registered in 2026, with a recorded age of approximately 0.02 years; registrar: Internet Domain Service BS Corp.
- The site uses a valid DV TLS certificate issued by YR2, valid to 2026-12-26.

What to Verify Next

Before installing the mod, confirm that the download is obtained from the project’s intended official channel and inspect the file with endpoint security controls or a sandbox appropriate for Java archives. Confirm compatibility with the stated Fabric Loader, Fabric API, Meteor Client, and Minecraft versions, and review the relevant game-server rules because several advertised functions alter gameplay or automate activity. For any support or dispute process, independently confirm the project’s official contact and distribution channels rather than relying solely on a page link.

EVIDENCE

- The installation and FAQ pages identify the required Fabric, Meteor Client, and compatibility prerequisites.
- The homepage and legal pages provide the project’s stated provenance and usage context but do not independently establish the operator’s real-world identity.

Summary Verdict

The website has a **moderate-trust posture**: its content is coherent, its stated purpose is explicit, and no scam or impersonation contradiction was identified. Legitimacy is evidence-consistent for an unofficial community software project, but the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and the observed edge address was 196.251.107.204 on AS214351, associated with FEMOIT - FEMO IT SOLUTIONS LIMITED, GB. The origin server was not observable, so this infrastructure provides exposure reduction but does not independently establish site ownership or legitimacy.

Closing Assessment

Ordinary browsing and low-stakes review are proportionate, while installation or other sensitive actions should follow independent provenance, file-safety, compatibility, and terms-of-use checks.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

3 findings contributed to this verdict, raised by governance, hosting and network, registration and ownership.

- 01 Governance

 - What the site offers, as described on its own pages, limits how high the score can go until more of it can be verified.

Governance rule:gov_business_model_cap
- 02 Hosting and network

 - The domain was registered less than three months ago.

Hosting and network rule:DNS_NEW_DOMAIN_90D

 - The hosting and network setup shows a moderate level of risk indicators.

Hosting and network rule:DNS_RISK_MED

 - The domain is young and has almost nothing else set up around it.

Hosting and network rule:DNS_SPARSE_YOUNG_DOMAIN

 - The domain is young and has a very small footprint on the network.

Hosting and network rule:DNS_LOW_FOOTPRINT_YOUNG_DOMAIN
- 03 Registration and ownership

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of argon-client.com.

- The request stayed on argon-client.com. It was not redirected to another domain. CLEAR
- Registration is published under Internet Domain Service BS Corp.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-21. NOTED
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about argon-client.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
