

Is arhaworld.com legit? TrustSniffer's high-trust assessment: 100/100

arhaworld.com

Verdict

100

OUT OF 100

HIGH TRUST

arhaworld.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Arha World appears to be a WordPress-based online designer clothing shop listing products with prices, contact phone and email. Site lacks visible ecommerce trust artifacts (detailed policies, verified payment badges, business registration) but shows normal retail content rather than scams or crypto/investment schemes.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Full analysis

Overview

Arha World is an online designer-clothing and accessories shop presenting bridal lehengas, gowns, sarees, kurtas, jumpsuits and related collections for direct purchase, with worldwide shipping, product listings in Indian rupees, and phone and email contact channels for orders or enquiries.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail model rather than phishing, investment, cryptocurrency, or impersonation content; technical testing also found no login form, hidden sensitive form, wallet connection, clipboard manipulation, cloaking, or suspicious inline scripts. The available reputation signals were clean, with no malicious or suspicious detections, no external blacklist indication, no abuse reports, and no matching broker-reputation entry. This supports an apparently legitimate, low-risk retail presentation, although it does not independently establish the real-world operator's identity.

EVIDENCE

- The homepage identifies “Arha World – Multi Designer Store” and displays designer clothing categories, product names, and prices.
- Behavioral testing recorded no hidden forms, password-exfiltration forms, wallet activity, wallet-drainer activity, or cloaking.
- External reputation data recorded 0 abuse reports, a whitelisted shared-content-delivery-network usage classification, and no external blacklist indication.
- Domain registration evidence: Registered 2019-08-06 (~7.04 years old).

Regulatory Verification Notes

The site appears to operate as a conventional clothing retailer and does not present itself as a regulated financial service. Its visible content includes a privacy policy, an About link, a telephone number, and a contact email, but the supplied pages do not show detailed shipping, refund, payment-protection, business-registration, or merchant-identity disclosures. These are transparency and transaction-assurance gaps rather than evidence of a scam. The available third-party broker dataset returned no match, which is contextual support only and is not a licensing or regulatory determination.

EVIDENCE

- The homepage footer provides an About link and a Privacy Policy link but does not visibly identify a legal company name or registration number in the captured content.
- The homepage displays product categories including bridal, lehengas, gowns, sarees, and kurta sets, consistent with an online retail business model.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-11-02.
- Historical capture record: 0 snapshots reported, with first seen 2021-06-25 and last seen 2025-09-05 across 5 years of tracked coverage; the sparse record is not treated as the domain's age.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should confirm the operating business name and its connection to Arha World. The applicable shipping, return, refund, cancellation, and payment-protection terms should be obtained from the site or an independently confirmed business channel, and the published contact routes should be validated through an offline or separately sourced route. For higher-value purchases, payment should use a method offering appropriate dispute and buyer-protection mechanisms.

EVIDENCE

- The homepage shows direct product prices, including ₹6,500.00, ₹7,500.00, ₹8,500.00, ₹10,500.00, and ₹12,300.00.
- The captured homepage contains a phone contact and an email contact for orders or enquiries.
- The page analysis identified no sensitive forms and no untrusted form destination.
- The site is implemented with WordPress, PHP, jQuery, and a visible WordPress administrator error message related to an unavailable Instagram feed.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated retail purpose. The classification is strong at the website-risk level, while the real-world operator remains independently unverified; that distinction should be preserved for business onboarding and payment decisions.

Infrastructure Integrity

The website is served through Cloudflare’s CDN/WAF infrastructure, which provides a meaningful mitigation against direct exposure and common delivery-layer abuse but is not, by itself, proof of legitimacy. Observed infrastructure includes Cloudflare edge addressing and a potential origin candidate within the resolved infrastructure picture.

EVIDENCE

- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Observed edge IPs include 104.21.42.55, 172.67.157.33, 2606:4700:3031::ac43:9d21, and 2606:4700:3033::6815:2a37.
- TLS certificate issuer: WE1; validation level DV; valid to 2026-11-02T16:46:04+00:00.

Closing Assessment

Normal browsing and ordinary retail engagement are proportionate to the available evidence, with independent merchant, fulfilment, and payment-protection checks completed before credentials or payment details are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arhaworld.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
