

Is arhivzajecar.org.rs a scam? TrustSniffer's high-risk assessment: 0/100

arhivzajecar.org.rs

Verdict

0

OUT OF 100

CRITICAL RISK

arhivzajecar.org.rs shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be	Regional historical archive website (Историјски архив Тимочка крајина Зајечар) containing news articles about exhibitions, book presentations, conferences, and archival publications. Contact details and institutional information included. No solicitation for funds or credentials detected.
------------------------------	---

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as the public informational site of the Regional Historical Archive “Timočka Krajina” in Zaječar, publishing Serbian-language news about exhibitions, book presentations, conferences, archival collections, publications, and institutional services rather than offering financial products or direct commercial transactions.

Scam/Impersonation Risk

The site’s content is consistent with a regional cultural institution: the homepage and archive-news material contain event announcements, bibliographic information, contact details, and institutional sections, with no observed credential solicitation, payment request, login form, or financial offer. However, this benign presentation is contradicted by strong external security detections: the domain is blacklisted by two supplied sources, and multiple security providers, including Fortinet and Sophos, have classified it as malicious. No distinct legal-entity identity contradiction or confirmed phishing or brand-impersonation finding was recorded, but the confirmed blacklist status is sufficient to create a serious risk for sensitive interaction. Evidence:

- The homepage is categorized as institutional archive news and contains exhibition, publication, conference, and archival-service content.
- Page analysis found no login form, hidden sensitive form, wallet connection, or solicitation for funds or credentials.
- External security telemetry recorded 10 malicious detections and a Tier-1 threat finding involving Fortinet and Sophos.
- The domain was first registered on 2012-05-25 and is approximately 14.25 years old; its historical record contains 1,376 snapshots across 15 tracked years from 2012 through 2026.

Regulatory Verification Notes

The site provides an apparent institutional identity and includes contact and organizational information, while the registration record lists ORION TELEKOM d.o.o. as registrar and “Istorisjki arhiv Timočka krajina Zaječar” as the registrant. Identity remains independently unverified. The website does not state a financial or commercial licensing basis, and no license number or licensing authority is presented; given the informational business model, this is primarily a disclosure point rather than evidence of financial solicitation. The external broker-reputation dataset contained no matching broker record. Evidence:

- The site’s navigation includes “About the Archive,” archive history, staff, collections, publishing activity, exhibitions, public procurement, and contact pages.
- No license claim, license number, or licensing authority is presented in the supplied business-model and page-content evidence.
- The domain is registered through ORION TELEKOM d.o.o.; the registration record expires on 2027-05-25.
- The site uses a valid DV TLS certificate issued by YR1, valid until 2026-09-23T12:16:51+00:00.

What to Verify Next

Before any credential, account, payment, file-download, or other sensitive interaction, the institution’s domain ownership should be confirmed through an independently obtained public-sector or archival contact route, rather than relying solely on contact details displayed on the site. Any licensing or official-status question should be checked with the relevant Serbian public registry or supervising authority, and the security detections should be resolved with the organization’s IT or hosting administrator before normal interactive use is restored. Evidence:

- The analyzed pages contain no login or sensitive-data form, supporting a strictly passive review while verification is pending.
- The site is presented as informational and institutional, so independent confirmation of the archive’s official domain and contact channels is the appropriate next control.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The website’s institutional presentation and long-running historical presence do not outweigh the confirmed external security contradictions, and the real-world operator remains unverified.

Infrastructure Integrity

A CDN/WAF layer was observed, with the visible address presented through edge infrastructure and no origin candidate exposed in the analysis. This provides some protection against direct origin exposure but does not establish legitimacy or offset the external security detections.

Closing Assessment

The appropriate interim posture is passive viewing only; credentials, account access, payments, and other sensitive actions should remain suspended until independent institutional confirmation and resolution of the security findings.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arhivzajecar.org.rs.

- The request stayed on arhivzajecar.org.rs. It was not redirected to another domain.

CLEAR
- Registration is published under ORION TELEKOM d.o.o..

CLEAR
- DNS for this domain is served by dnsserve.rs, across 2 name servers.

NOTED
- The registration is paid up to 2027-05-25.

NOTED
- The earliest public archive of this site is from 2012-10-20.

CLEAR
- It is hosted on HETZNER-AS, from a server in DE.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arhivzajecar.org.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
