

Is arildfolgero.com a scam? TrustSniffer's high-risk assessment: 0/100

arildfolgero.com

Verdict

0

OUT OF 100

CRITICAL RISK

arildfolgero.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Promotional landing page for 'AURUM', an AI+Blockchain financial product/NeoBank that touts licenses and millions AUM while encouraging direct signup and contact via messaging apps. Mentions network marketing, forex, and cryptocurrency investments but provides no verifiable credentials, contact details, or product mechanics. Structural indicators point to high risk for financial loss and recruitment-style monetization.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What arildfolgero.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a promotional landing page for “AURUM,” presented as an AI-and-blockchain financial offering and Web3 “NeoBank” intended to attract signups, investment participation, and network-marketing engagement. It promotes digital-asset and fiat management, claims international licensing and millions in assets under management, and directs visitors toward messaging-app contact channels.

Scam/Impersonation Risk

The site presents a critical sensitive-interaction risk. No confirmed brand impersonation or phishing form was identified, but contradictions are present: external reputation checks recorded malicious and suspicious detections, and the domain is reported on external blacklists. These findings converge with the homepage’s high-stakes claims and weak supporting evidence. The page asserts “international licenses,” “millions in assets under management,” and a “global partner network,” yet supplies no verifiable credentials, detailed product mechanics, or accountable business contact information. Its direct-signup call to action and references to

network marketing, forex, cryptocurrency investment, and capital growth create a deposit-before-service and opaque-value-flow concern. The disclaimer that participants may lose capital does not resolve the absence of substantiation for the underlying financial claims.

EVIDENCE

- The homepage promotes AURUM, an AI-and-blockchain financial product and Web3 “NeoBank,” while directing visitors to sign up and contact representatives through messaging applications.
- The homepage makes licensing and assets-under-management claims without presenting supporting license details, credentials, or operating mechanics.
- External reputation telemetry records 2 malicious and 1 suspicious detections, with an external blacklist status of true; no malicious Google Safe Browsing result was recorded.
- Domain registration telemetry records creation on 2009-03-29 and an age of 17.4 years; archival telemetry records 16 snapshots spanning 2011–2025 across 15 years.

Regulatory Verification Notes

The legal and regulatory position is not established by the material supplied. The site’s reference to “international licenses” is an on-page claim rather than independently verified evidence, and the available content does not identify a licensing authority or license number. The business presentation combines financial promotion, cryptocurrency, forex, and recruitment-oriented network marketing, so the relevant permissions and consumer-protection obligations would depend on the jurisdictions in which it solicits participants. A third-party broker-intelligence dataset produced no match; that is contextual only and does not constitute regulatory approval or clearance. The domain’s registration through GoDaddy.com, LLC and the use of registration privacy are administrative facts, not proof of legitimacy or illegitimacy.

EVIDENCE

- The homepage contains an “Important Disclaimer” covering network marketing, forex trading, cryptocurrency investment risk, and possible loss of capital, but does not provide a regulator, license number, or verifiable corporate credentials.
- Registration telemetry identifies GoDaddy.com, LLC as registrar, with creation date 2009-03-29 and expiration date 2027-03-29.
- The site’s transport encryption uses a DV certificate issued by YE2, valid through 2026-09-17.
- The site is served from AS40676, identified as Psychz Networks, US.

What to Verify Next

Before any financial, credential, or account interaction, an institution should independently confirm the operator’s legal entity, the claimed licensing with the relevant financial regulator, the custody and movement of funds, withdrawal conditions, and the contractual basis for any referral compensation. Contact channels should be confirmed through an independent, offline route rather than relying solely on the landing page. No deposits, investments, or credentials should be provided while those checks remain unresolved.

EVIDENCE

- The homepage provides a direct-signup route but no visible form, detailed terms, or independently verifiable operating documentation.
- The published business description indicates that participation may involve investment structures and network-marketing recruitment, requiring examination of fund flows and compensation arrangements.
- Technical behavior recorded no login form, sensitive form, wallet connection, or wallet-drainer activity during the observed runs; this does not validate the financial proposition.
- The page was successfully retrieved with HTTP 200 responses during 2 observed runs, while one non-whitelisted external request was identified.

Summary Verdict

The website should be treated as an **unverified, critical-risk financial promotion** rather than as a trustworthy service provider. The combination of corroborated external threat detections, blacklist status, unsupported financial claims, and an opaque recruitment-oriented value proposition makes sensitive interaction unjustified on the available evidence.

Infrastructure Integrity

The site benefits from CDN/WAF protection, and the observed edge address, 147.189.135.64, belongs to AS40676, Psychz Networks, US. The origin server was not observable in this analysis; the protective edge architecture may reduce direct exposure, but it is only a mitigating infrastructure characteristic and does not offset the site's reputation and content risks.

Closing Assessment

Enterprise users should block or quarantine the domain for financial and credential-related workflows and require independent identity, regulatory, and fund-flow validation before considering any further engagement.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arildfolgero.com.

- The request stayed on arildfolgero.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by hosixy.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-03-29. [NOTED](#)
- The earliest public archive of this site is from 2011-02-10. [CLEAR](#)
- It is hosted on AS40676, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arildfolgero.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
