

Is arisavid.ai safe? TrustSniffer's moderate-trust assessment: 65/100

arisavid.ai

Verdict

65

OUT OF 100

MODERATE TRUST

arisavid.ai is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

ArisaVid is an educational studio offering in-depth AI teaching materials: videos, books, articles, and certified courses with learning tracks covering Python, ML, DL, and reinforcement learning.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

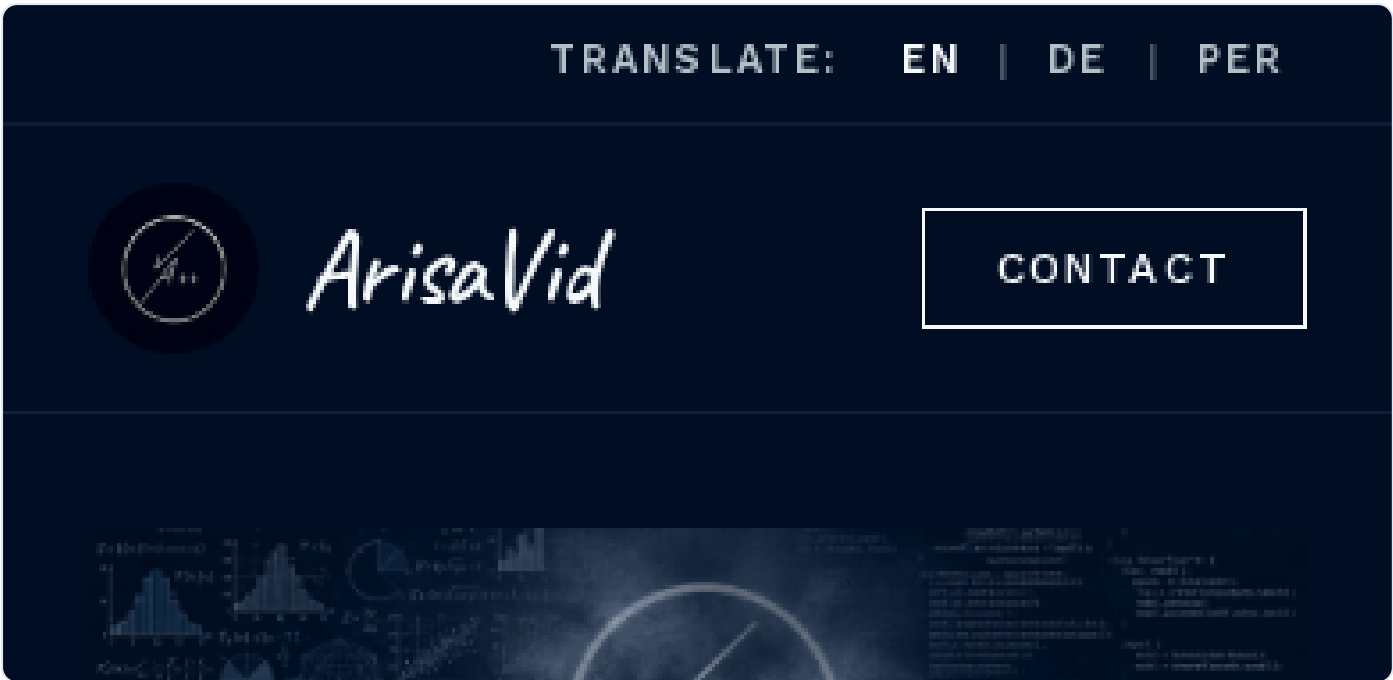

At a glance

The checks that decide most of this verdict.

The page as captured

https://arisavid.ai/

What arisavid.ai served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

ArisaVid is an educational website presenting AI learning materials, including teaching videos, books, articles, and courses, with structured learning tracks in Python, machine learning, deep learning, and reinforcement learning. Its apparent business model is the sale and publication of educational content and the provision of courses, including institution-focused certified courses.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other identity contradiction was identified. The homepage and learning-track pages present a coherent education-focused model rather than a deceptive financial or investment proposition; the site also has no login form, sensitive-input form, wallet activity, or suspicious external submission behavior. An external reputation signal consists of abuse reports associated with the observed shared CDN address, but that attribution is to shared infrastructure rather than specifically to ArisaVid, so it does not establish malicious activity by the website. The available evidence therefore supports a low apparent scam or impersonation risk, while the operator's real-world identity remains only likely rather than independently verified.

EVIDENCE

- The homepage describes AI teaching videos, books, articles, and courses and contains no detected phishing or impersonation indicators.
- The learning-track pages cover Python, machine learning, deep learning, and reinforcement learning without financial, cryptocurrency, or high-pressure payment features.
- Reputation checks found no malicious or suspicious domain detections; the observed address carries 81 abuse reports attributed to shared CDN infrastructure.

Regulatory Verification Notes

ArisaVid's About page describes an educational institution producing books, video seminars, articles, and certified courses for institutions. No specific regulatory licence, registration number, or accrediting authority was identified in the reviewed site content; this is a transparency and accreditation-verification issue rather than evidence of fraud, particularly because the apparent business model is education rather than a regulated financial service. The site's identity is supported by consistent page content and links to LinkedIn and YouTube, but the available evidence does not independently verify the legal operator or establish that the word "certified" denotes external accreditation. The domain and technical controls provide useful supporting context, although they do not prove ownership or accreditation.

EVIDENCE

- Domain registered through NAMECHEAP INC on 2026-06-23 and currently approximately 0.25 years old.
- Served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-12-08.
- The About page refers to certified institutional courses but does not identify a specific licensing or accrediting authority.

What to Verify Next

Before purchasing institutional training, relying on a certification for professional or academic purposes, or committing substantial funds, the prospective counterparty should independently confirm the legal entity behind ArisaVid, the scope and recognition of its certifications, and the applicable refund or course-delivery terms. Contact details and social-profile links should be validated through an independent channel, and any claimed accreditation should be checked directly with the named accrediting body or institution.

EVIDENCE

- The About page makes institutional certification claims without naming an external accrediting body.
- The site provides About and Contact navigation and links to LinkedIn and YouTube, offering channels for independent consistency checks.

Summary Verdict

ArisaVid presents as an apparently legitimate educational website with coherent content, benign observed behavior, and no identified scam or impersonation contradiction. Its moderate-trust posture reflects useful

technical and content evidence alongside limited independent confirmation of the operating entity and certification claims. Verification is therefore appropriate before high-value or sensitive engagements.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed service address belonging to Cloudflare's edge network and no origin candidate identified in the analysis. This provides a mitigating layer against direct exposure of the hosting environment, but edge protection is an infrastructure control rather than proof of legitimacy.

Closing Assessment

Ordinary informational use is proportionate, while substantial payments, institutional commitments, or reliance on certification should proceed only after the relevant entity, accreditation, and commercial terms have been independently confirmed.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

Signals weighed against the site

- AbuseIPDB: 81 reports on hosting IP 185.158.133.1 (Internet Utilities Europe and Asia Limited, Content Delivery Network), 49% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arisavid.ai.

- The request stayed on arisavid.ai. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arisavid.ai at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
