

Is armastore.com.br legit? TrustSniffer's high-trust assessment: 100/100

armastore.com.br

Verdict

100

OUT OF 100

HIGH TRUST

armastore.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

Página inicial de uma loja brasileira de armas, munições, airsoft e acessórios, com catálogo, preços em reais, descontos via Pix, parcelamento, carrinho, blog e clube de tiro. Exibe telefone, e-mail, endereço físico, CNPJ, políticas de entrega e devolução, verificação de maioridade e avisos de que produtos controlados dependem de documentação e autorização legal.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Brazilian e-commerce storefront offering firearms, ammunition, airsoft equipment, shooting accessories, and shooting-club services, with prices in Brazilian reais, online purchasing facilities, and notices that controlled products require the applicable documentation and legal authorization.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation signals were observed. The domain's established registration and continuous archival record align with the current commercial identity, while interactive testing found no hidden forms, credential diversion, cloaking, clipboard manipulation, or suspicious scripts. The evidence therefore supports a legitimate storefront rather than a deceptive imitation or transient fraud operation.

- The domain-registration record shows registration in 2019 (~6.73 years old), with creation on 2019-11-13 and expiry on 2029-11-13.
- The web archive contains 51 snapshots spanning 2020-08-06–2025-12-09, covering 6 tracked years; no suspicious repurposing or semantic conflict was established.
- The homepage consistently identifies the business as “Arma Store” and presents a developed catalogue, account area, shopping cart, physical-location information, and linked Instagram and Telegram profiles.
- Behavioral examination of the homepage found no login form, hidden form, untrusted form destination, cloaking, wallet interaction, clipboard hijacking, or suspicious inline script.

Regulatory Verification Notes

The homepage publishes a CNPJ reference, physical address, telephone contact, commercial policies, age verification, and notices concerning documentation and authorization for controlled goods. It specifically markets firearms and ammunition alongside airsoft products, training, consulting, maintenance, repair, and shooting-club services; those activities carry regulatory obligations beyond ordinary retail. The supplied pages do not establish a named licensing authority or licence number, so the precise regulatory permissions cannot be determined from the website content reviewed. This is a disclosure-verification matter, not evidence of impersonation or fraud, and no adverse broker-reputation match was identified.

- The homepage states that controlled products depend on legally required documentation and authorization and displays an age-verification mechanism.
- The homepage links to delivery, returns, privacy, payment, contact, company, and location pages and presents Pix, card, and in-person payment options.

- The site is served from AS47583 (AS-HOSTINGER — Hostinger International Limited, CY).
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-09-29.

What to Verify Next

For procurement, partnership, or controlled-product transactions, the displayed CNPJ and physical establishment should be matched against the relevant Brazilian corporate records. Any authorization required for firearms commerce, ammunition, training, or shooting-club operations should be confirmed directly with the competent registry using the legal entity identified there. Official payment and contact channels should also be confirmed through an independently sourced business record before a material transaction.

- The homepage supplies the business identifiers needed to initiate an independent corporate-record comparison.
- The site's controlled-product notices establish that transaction eligibility depends on documentation and authorization outside the ordinary checkout process.
- The company, location, contact, privacy, delivery, and returns links provide distinct records that can be compared for legal-name and address consistency.

Summary Verdict

The available evidence supports a legitimate, established, and trustworthy commercial website with coherent identity, sustained operating history, clean external reputation, and normal storefront behavior. No contradictory security or identity indicators were found. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves through Hostinger infrastructure without a detected CDN or WAF layer, and four likely origin addresses are directly observable. This is a conventional hosting posture rather than evidence of abuse; valid transport encryption protects browser-to-site communications, although direct origin visibility provides less network-layer shielding than a dedicated edge-security service.

Closing Assessment

Prospective customers may use the site normally, while regulated or materially significant transactions should follow standard independent counterparty and authorization checks.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of armastore.com.br.

- The request stayed on armastore.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2029-11-13. CLEAR
- The earliest public archive of this site is from 2020-08-06. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about armastore.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
