

Is armcci.am legit? TrustSniffer's high-trust assessment: 90/100

armcci.am

Verdict

90

OUT OF 100

HIGH TRUST

armcci.am appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Official-looking Armenian Chamber of Commerce website with multilingual navigation, services, events, contact email and phone. No signs of phishing, crypto investment promises, or credential harvesting.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an official-looking, multilingual Armenian Chamber of Commerce portal presenting organizational information, business services, certification, arbitration, education, exhibitions, events, membership benefits, news, and contact facilities. Its apparent model is institutional and business-to-business, supported by memberships, paid services, certification activities, and events rather than investment or consumer-finance offerings.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent chamber-of-commerce structure with sections for organizational history, strategy, presidium, staff, international activity, legislation, services, regional chambers, membership, events, and news. Its sole observed form is a contact form without password or other sensitive-data collection, and there were no observed phishing, brand-impersonation, credential-harvesting, cryptocurrency, or wallet-connection indicators. The available external reputation checks recorded no malicious or suspicious findings and no blacklist or phishing indicator; coverage was partial, so this supports rather than independently proves legitimacy. The website is therefore apparently legitimate and evidence-consistent with an established institutional site, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies the site as an organization or chamber of commerce and provides structured sections for history, leadership, services, membership, events, and news.
- The homepage contains one contact form classified as non-sensitive, with no login form, hidden form, password submission, wallet connection, or external password destination.
- The domain was registered in 2007 and is approximately 19.1 years old; its historical continuity is supported by 478 archive snapshots spanning 2007–2026, covering 20 tracked years.
- Available external checks recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `external\_blacklist: false`; reputation coverage was marked partial.

Regulatory Verification Notes

The site presents institutional and commercial-service content, including certification, paid services, legal services, arbitration, education, membership, and business-interest representation. The reviewed material does not present a licensing claim or license number; this is a regulatory-disclosure gap requiring confirmation where a specific service is subject to authorization, but it is not an observed scam indicator. The site's apparent organizational identity is not independently verified, and the available material should not be treated as proof of a legally registered operator or regulated status. Transport security and infrastructure identification are positive technical signals: the site is served through a known network provider, uses a valid domain-validated certificate, and is registered through ABCDomain LLC.

EVIDENCE

- The homepage and organizational navigation expose pages for "About," historical background, strategy, presidium, commissions, staff, international activity, legislation, services, membership, and publications.
- The homepage lists certification, paid services, arbitration, education, exhibitions, business conferences, and membership benefits, but no licensing authority or license number is presented in the reviewed material.
- Hosting is recorded on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS is issued by WE1 at DV validation level and is valid to `2026-09-23T07:03:49+00:00`; the registrar is `abcdomain (ABCDomain LLC)`.

What to Verify Next

Before credential or payment interactions relating to membership or paid services, the prospective counterparty should independently confirm the chamber's legal identity and any applicable authorization with the relevant Armenian corporate or regulatory authority. Terms governing paid services, certification, membership obligations, refunds, and dispute handling should be reviewed directly on the site or obtained through an independently confirmed institutional channel. Contact details should be cross-checked through an independent offline or institutional source, and payment-protection arrangements should be confirmed before any transaction.

EVIDENCE

- The services and membership areas indicate that the site may support paid business services and membership relationships.
- The contact page provides a telephone channel and a contact form that can be used for independent confirmation of the relevant service process.
- The navigation includes pages for legislation, arbitration, certification, and paid services, which are the appropriate locations for checking governing terms and authorization disclosures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, but the operator's real-world identity has not been independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is a mitigating infrastructure signal, and all observed addresses were Cloudflare edge addresses rather than identified origin infrastructure. This reduces direct origin exposure and supports a technically conventional hosting posture, but protective infrastructure alone does not establish organizational legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the observed risk posture; independent identity, service terms, payment-protection, and authorization checks should be completed before account, membership, or paid-service commitments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of armcci.am.

- The request stayed on armcci.am. It was not redirected to another domain. [CLEAR](#)
- Registration is published under abcdomain (ABCDomain LLC). [CLEAR](#)

- The earliest public archive of this site is from 2007-07-12. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about armcci.am at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
