

Is arnebrachhold.de legit? TrustSniffer's high-trust assessment: 95/100

arnebrachhold.de

Verdict

95

OUT OF 100

HIGH TRUST

arnebrachhold.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Public professional portfolio for Arne Brachhold, senior manager at Mercedes-Benz Group. Includes bio, links to work and hobby projects, and LinkedIn contact. Site powered by Astro and Cloudflare Pages.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a personal professional portfolio for Arne Brachhold, presenting an employment biography, work history, hobby and open-source projects, and links to professional contact channels. Its apparent purpose is informational and career-related, with no evident monetization, account service, or financial transaction model.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent personal profile rather than a commercial or financial solicitation, and the stated professional background is accompanied by links to work, projects, and LinkedIn. The available evidence therefore supports a low scam and impersonation risk, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Arne Brachhold, describes a senior-management role at Mercedes-Benz Group, and links to work, hobby projects, and LinkedIn.
- The homepage contains no login form, payment workflow, wallet connection, hidden form, or other sensitive-action mechanism.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result; the domain was recorded at rank 15,282 and within the global top one million.

Regulatory Verification Notes

The site is a personal portfolio and does not present a regulated financial service, investment offer, or licensing claim. Its navigation includes an imprint and privacy-policy page, but the supplied evidence does not independently verify the person or any employment affiliation; the on-site identity should therefore be treated as apparent and evidence-consistent, not proven. No adverse broker-related match or other third-party reputational warning was identified. The absence of a financial-service licensing disclosure is not material to the stated portfolio purpose, but any future change toward paid services would require a fresh regulatory review.

EVIDENCE

- The site provides dedicated “Imprint” and “Privacy Policy” pages.
- The work page is described as a professional overview, while the homepage presents software, architecture, automotive, cloud, and production-systems experience.
- The site links to LinkedIn and to Mercedes-Benz’s public domain as external professional references.
- The website’s transport encryption uses a DV certificate issued by WE1, valid to 2026-11-12.

What to Verify Next

Before relying on the professional biography for employment, contracting, or other consequential decisions, independently cross-check the profile through a separately accessed professional channel and confirm any relevant engagement terms outside the website. If the site later introduces account access, paid services, or payment collection, confirm the operator’s identity, applicable terms, and payment protections through independent channels before proceeding.

EVIDENCE

- The homepage provides LinkedIn as the stated professional-enquiry channel rather than presenting an on-site submission form.
- The captured site presents informational pages and project links, with no observed payment, credential, or account-action workflow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate personal website and supports a high-trust, low-risk posture. The classification is strong, but it should not be interpreted as independent proof of the real-world operator’s identity.

Infrastructure Integrity

The website is served through Cloudflare’s CDN/WAF, which is a mitigating control that reduces direct exposure of the hosting environment but is not, by itself, proof of legitimacy. All observed addresses were CDN edge endpoints, and no origin-server candidate was identified in the infrastructure assessment.

EVIDENCE

- Served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Four observed IP addresses were identified as Cloudflare edge endpoints; likely origin IP count was 0.
- TLS validation level: DV; issuer: WE1; certificate valid to 2026-11-12T20:42:06+00:00.

Closing Assessment

Normal browsing and review of the public portfolio are proportionate to the assessed posture. For any future credential or payment interaction, ordinary independent checks of merchant identity, applicable terms, and payment protection should be completed first.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arnebrachhold.de.

- The request stayed on arnebrachhold.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arnebrachhold.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
