Full analysis

Overview

Aroma Espresso is a South Florida gourmet espresso and coffee-bar catering website serving weddings, corporate events, private parties, trade shows, and other gatherings, with additional offerings for coffee blends, event branding, and quote-based bookings.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-business model rather than an investment, cryptocurrency, or credential-harvesting operation; the site has no login form, sensitive form, wallet connection, hidden form, or suspicious external submission behavior. A reputational signal exists against a shared Squarespace content-delivery IP, but it is attributed to shared provider infrastructure rather than specifically to Aroma Espresso and therefore does not establish domain-level abuse. The available evidence is consistent with an established, apparently legitimate business website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies “Aroma Espresso” as a South Florida coffee-catering business and describes event services, coffee products, testimonials, and quote requests.
- Browser behavior recorded no external XHR or POST activity, hidden forms, password forms, wallet activity, clipboard manipulation, or cloaking.
- Shared Squarespace infrastructure IP associated with the hosting provider has 24 abuse reports; the attribution states that the reports apply to shared provider infrastructure rather than specifically to this site.
- The domain was registered on 2004-07-30 and is 22.07 years old; archival records contain 77 snapshots spanning 2006–2025 across 20 years tracked.

Regulatory Verification Notes

The website presents ordinary catering and product-sale activities, not a financial service or other visibly regulated offering. No regulatory license is claimed on the supplied pages, and no evidence indicates that such a license is necessary for the stated business model. The site's own references to its name, South Florida presence, and history support an apparent commercial identity, but they do not independently prove the legal entity operating the domain. Registration privacy through GoDaddy's privacy service is an administrative detail rather than an identity contradiction. Any engagement should therefore distinguish the site's credible commercial presentation from independent confirmation of the operator's legal identity.

EVIDENCE

- The homepage describes on-site espresso and coffee-bar catering for weddings, corporate events, private parties, and related occasions.
- The About and Contact navigation presents the business as an established local service provider, while the supplied evidence contains no independently verified legal-entity or licensing record.
- The site is hosted on AS53831, SQUARESPACE - Squarespace, Inc., US.
- TLS uses issuer YR2 with DV validation and is valid through 2026-10-01T05:55:44+00:00.

What to Verify Next

Before payment or submission of personal information, an interested customer should independently confirm the business's legal trading name, service address, quotation terms, cancellation or refund conditions, and the payment processor's protection mechanisms. For a booking or product purchase, the customer should also confirm that the final invoice, payment recipient, and contact channels correspond to the business identified through an independent source, such as an established offline referral or a separately obtained business record.

EVIDENCE

- The homepage provides service descriptions, service-area claims, testimonials, and a “Get A Quote” pathway that can be checked against the final commercial terms.
- The site's Contact and About pathways provide the primary business information requiring independent comparison before payment.
- The available analysis found no financial-scheme, phishing, credential-harvesting, or wallet-drainer indicators.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence between the site's coherent local-business presentation, stable technical operation, long domain history, and absence of contradictory or malicious signals. The website is evidence-consistent with an established, apparently legitimate service, while operator identity remains a separate matter that has not been independently verified.

Infrastructure Integrity

The site is served through Squarespace infrastructure in the United States, with a resolved and stable hosting configuration and no identified CDN or WAF edge layer. This mainstream hosted-service posture is a mitigating technical signal, but it is not by itself proof of the business's legitimacy.

EVIDENCE

- Hosting provider: SQUARESPACE - Squarespace, Inc., US.
- Hosting ASN: AS53831; resolved infrastructure is recorded in ARIN.
- The site's transport encryption uses a valid DV certificate issued by YR2, expiring 2026-10-01T05:55:44+00:00.

Closing Assessment

Normal browsing and ordinary commercial engagement are proportionate to the available risk posture, provided that independent merchant-identity, transaction-term, and payment-protection checks are completed before credentials or payment details are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aromaespresso.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
