Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

AROMAR Música y Danza is an informational education and arts website presenting a local music, dance, and theatre school in Almuñécar, Granada. It describes regulated music and dance instruction, free-learning programs, professional dance education, performances, festivals, and summer camps, with visitor-facing information on the institution, academic offerings, staff, facilities, enrolment, and contact arrangements.

Scam/Impersonation Risk

The site's visible content is consistent with an educational institution and does not itself show a login form, payment workflow, phishing form, brand-impersonation indicator, or identity inconsistency. However, this benign presentation is materially outweighed by confirmed external security contradictions: the domain is blacklisted by multiple external sources, with malicious and suspicious classifications recorded across the evaluated reputation coverage. This creates a critical risk for sensitive interaction even though the page-level content contains no obvious fraudulent mechanics. No confirmed identity contradiction, phishing indicator, or impersonation finding was supplied; the principal concern is the external malicious-reputation signal.

EVIDENCE

- The homepage identifies AROMAR as a municipal music, dance, and theatre school and lists academic programmes, performances, and camps.
- External reputation telemetry recorded 14 malicious and 2 suspicious detections from 21 evaluated results, with a blacklist flag active.
- The domain was registered on 2022-05-25 and has an age of 4.24 years.

Regulatory Verification Notes

The academic pages describe the organisation as a “Conservatorio Privado Oficial” and refer to regulated professional instruction, while also presenting it as the municipal school for music, dance, and theatre. Those statements are site claims rather than independently verified evidence of institutional authorization. The supplied content does not provide a license number, licensing authority, or clear legal-entity disclosure, and independent operator identity remains unverified. This is a regulatory and governance verification gap, separate from the external security contradiction. The presence of standard transport encryption and identifiable hosting infrastructure is technically positive but does not establish authorization or legitimacy.

EVIDENCE

- The academic-offerings content states “Conservatorio Privado Oficial” and “Enseñanza reglada. Enseñanzas profesionales.”
- The institutional navigation includes “Conócenos,” “Nuestro Equipo,” “Secretaría,” and “Contacto,” but the supplied content contains no license number or named licensing authority.
- The site is hosted on AS47583, AS-HOSTINGER — Hostinger International Limited, CY.
- The TLS certificate is issued by YE2 at DV validation level and is valid to 2026-11-10.

What to Verify Next

Before any sensitive interaction, an independent confirmation should be obtained from the relevant municipal or education authority that the named school and its regulated programmes are currently authorized. The organisation's legal name, responsible entity, enrolment terms, refund conditions, and payment recipient should be matched against independently obtained institutional records. Contact channels should be confirmed through an independently sourced municipal or institutional route rather than relying solely on the website.

EVIDENCE

- The homepage and academic pages provide the institution name, programme descriptions, and enrolment-related navigation needed for an external comparison.
- The site presents both municipal-school and private-conservatory descriptions, making authority and operating-entity confirmation particularly material.
- The captured page contained no sensitive form or login form, so any request for credentials or payment should be treated as a separate interaction requiring independent validation.

Summary Verdict

The overall posture is critical, with confirmed external security contradictions overriding the otherwise plausible educational presentation. The website may represent a real local organisation, but its identity and legitimacy are not independently verified and the available evidence does not support sensitive interaction.

Infrastructure Integrity

The site resolves directly to likely origin infrastructure hosted by Hostinger on AS47583, with no CDN detected in the supplied network analysis. The valid DV certificate provides transport encryption, but this infrastructure posture is only a limited technical mitigation and does not offset the external reputation findings.

Closing Assessment

Pending independent confirmation through authoritative institutional channels, interaction should be limited to passive viewing; credentials, payments, and other sensitive actions should not be undertaken through the site.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aromarmusicadanza.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
