

Is arshbroadcast.com a scam? TrustSniffer's high-risk assessment: 0/100

arshbroadcast.com

Verdict

0

OUT OF 100

CRITICAL RISK

arshbroadcast.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Page fragment contains a single image element inside simple container divs; no textual content or interactive elements to analyze.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://arshbroadcast.com/>

What arshbroadcast.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents an image-only landing page with no readable business description, navigation, interactive controls, or discernible commercial purpose. Its apparent function and operating model cannot be established from the available presentation.

Scam/Impersonation Risk

The site carries a **critical sensitive-interaction risk** because external security intelligence recorded confirmed blacklist status, including 14 malicious and one suspicious detections among evaluated results. This is a direct contradiction to treating the domain as safe for credentials, login, or financial activity. No distinct legal-entity conflict or brand-impersonation signal was identified, but the absence of substantive page content prevents the site from establishing a credible identity or purpose. The available historical record does not indicate a suspicious repurposing pattern; that positive point does not offset the external threat detections.

EVIDENCE

- External reputation checks recorded 14 malicious detections and 1 suspicious detection from 20 evaluated results; the domain was also present on external blacklists.
- The homepage capture contained only a single image element, with no textual business explanation, links, forms, or login mechanism.
- The registration record shows creation on 2023-02-20 and an age of approximately 3.5 years; historical records contain 146 snapshots across 5 tracked years, from 2021 through 2026.

Regulatory Verification Notes

The site does not present a discernible business model, legal identity, licensing claim, or registration number in the available page material. This is a material disclosure gap for any website that might solicit accounts, payments, investments, or other regulated activity, and licensing cannot be inferred from the domain or technical controls. The real-world operator remains unverified. A valid transport certificate and identifiable hosting arrangement are technical facts only and do not establish regulatory status or legitimacy.

EVIDENCE

- The homepage has no readable title, metadata description, or legal or corporate disclosure in the captured content.
- The domain is registered through CSL Computer Service Langenbach GmbH d/b/a joker.com; the WHOIS record lists no organization.
- The site is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- TLS uses issuer YR2 with DV validation and is valid to 2026-09-27.

What to Verify Next

Before any sensitive interaction, an organization should confirm the operator's legal name and licensing status directly with the relevant financial or corporate registry, using details obtained from an independently trusted source rather than relying on the website alone. The terms, privacy, payment, refund, and dispute provisions should be reviewed for a consistent legal counterparty. Official contact channels should be confirmed through an independent offline or previously trusted route, and endpoint protections should remain active if the domain must be accessed for investigative purposes.

EVIDENCE

- The homepage provides insufficient information to identify the service category or responsible entity.
- No license authority or license number is presented in the available business-model evidence.
- The captured page contains no forms or interactive elements through which ownership or service terms could be independently assessed.

Summary Verdict

The available evidence supports a critical-risk posture for sensitive interaction. Confirmed external threat detections and blacklist status outweigh the site's limited positive technical indicators, while the operator's

identity and purpose remain unverified. The website should not be treated as an established or trustworthy destination for credentials, account access, or financial activity.

Infrastructure Integrity

CDN/WAF protection is present, and the observed edge address is associated with AS24940 and Hetzner Online GmbH in Germany; origin visibility was not available in the infrastructure assessment. These controls may reduce direct exposure of the underlying service and can support operational resilience, but they provide no assurance that the website itself is legitimate.

Closing Assessment

Access should be limited to controlled investigation, with sensitive interaction deferred unless independent identity, regulatory, and security checks produce affirmative results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arshbroadcast.com.

- The request stayed on arshbroadcast.com. It was not redirected to another domain. CLEAR
- Registration is published under CSL Computer Service Langenbach GmbH d/b/a joker.com. CLEAR
- DNS for this domain is served by mihanwebhost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-20. NOTED
- The earliest public archive of this site is from 2021-06-05. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arshbroadcast.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
