

Is arvetblog.es safe? TrustSniffer's moderate-trust assessment: 50/100

arvetblog.es

Verdict

50

OUT OF 100

MODERATE TRUST

arvetblog.es is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Public blog of ARVET (trade association) in Spanish, listing news, webinars, international missions, funding notices and sector categories. Contact address and social links visible; content is informational and targeted at members/industry stakeholders.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Spanish-language public blog presenting ARVET as a trade association for sectors including bathroom products, hardware and DIY, and cleaning and hygiene. It publishes association news, webinars, export-promotion activities, funding notices and research-project information, with an apparent informational and member-service business model rather than direct financial solicitation.

Scam/Impersonation Risk

The site's visible content is consistent with an informational trade association: the homepage presents sector news, events, research activities, a physical address, telephone details and links to established social platforms, while no login form, payment form, cryptocurrency functionality or credential-harvesting mechanism was observed. However, this benign presentation is contradicted by external threat intelligence: the domain has a confirmed blacklist status, with two malicious and two suspicious detections among the evaluated results. That contradiction materially elevates the risk of sensitive interaction despite the absence of page-level impersonation, phishing or solicitation indicators. No identity contradiction was observed across the reviewed site content, but the real-world operator identity remains only likely rather than independently verified.

EVIDENCE

- The homepage identifies “Arvet Blog - Arvet” and presents association news, webinars, sector categories and research-project content.
- The contact area of the homepage displays a Valencia street address, telephone and fax details, alongside Facebook, Twitter and LinkedIn links.
- External reputation assessment recorded 2 malicious and 2 suspicious detections, together with a confirmed blacklist status for the domain.
- Behavioral inspection found no login form, hidden form, password-external form, wallet connection, wallet drainer or clipboard-hijacking activity.

Regulatory Verification Notes

The reviewed pages describe an industry association and informational publishing activity, not a regulated financial service. The site does not present a licensing claim, regulator, or registration number in the examined content; this is a disclosure gap requiring confirmation if the association, membership, funding or event-related activities involve regulated services or financial arrangements. The published physical contact details and sector-specific material support an apparently coherent organizational presentation, while the available social links provide contextual identity signals rather than proof of legal ownership or regulatory standing. A separate broker-reputation dataset returned no match, which is a limited contextual signal and not a licensing or legal determination.

EVIDENCE

- The homepage's navigation includes “La Agrupación,” “Asóciate,” “Servicios para Asociados,” “Contacto,” sector categories and research-project sections.
- The homepage identifies the apparent organization as ARVET and publishes a Valencia contact address and telephone numbers.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-10-06.
- The site is hosted on AS42612, DINAHOSTING-AS - DinaHosting S.L., ES.

What to Verify Next

Before any sensitive interaction, an independent offline route should confirm that the published ARVET contact details and social profiles correspond to the intended association. Any claimed membership, funding, event or commercial arrangement should be validated against the relevant official organizational or regulatory register, with payment and contractual details confirmed through independently sourced channels rather than relying solely on the website. If the domain is required for operational use, the blacklist contradiction should be resolved by the responsible security or fraud team before credentials, payments or other sensitive data are submitted.

EVIDENCE

- The homepage provides the primary organizational name, physical contact details and social-channel references available for independent confirmation.
- The reviewed content is informational and contains no sensitive forms or direct payment workflow.
- The external reputation findings are the specific basis for escalation before sensitive interaction.

Summary Verdict

The website presents a coherent, apparently legitimate informational association profile, but its overall trust posture is **moderate with elevated sensitive-interaction risk**. The confirmed external reputation contradiction prevents the available organizational and content signals from supporting routine trust for credentials, payments or other high-impact actions.

Infrastructure Integrity

The site resolves directly to a single identified hosting address on DinaHosting S.L. in Spain, with no CDN or WAF detected and a likely origin address visible. The valid DV TLS certificate provides transport protection, but the hosting arrangement and certificate do not establish operator legitimacy or offset the external reputation concern.

Closing Assessment

Passive review of publicly available information is the proportionate use case; credentials, payments and other sensitive actions should remain withheld unless independent organizational and security validation clears the identified reputation issue.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arvetblog.es.

- The request stayed on arvetblog.es. It was not redirected to another domain. [CLEAR](#)

- The earliest public archive of this site is from 2011-10-15. [CLEAR](#)
- It is hosted on DINAHOSTING-AS, from a server in ES. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arvetblog.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
