

Is arzt-auskunft.de legit? TrustSniffer's high-trust assessment: 100/100

arzt-auskunft.de

Verdict

100

OUT OF 100

HIGH TRUST

arzt-auskunft.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

German healthcare search portal from Stiftung Gesundheit for finding doctors, therapists, clinics, pharmacies, appointments, and accessible practices. It also offers paid practice profiles, certifications, directory integrations, research, and nonprofit-support programs.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a German healthcare-provider directory operated under the Stiftung Gesundheit identity, enabling searches for doctors, therapists, clinics, pharmacies, appointment availability, and accessible practices. Its public-service directory is supported by optional premium practice profiles, certification and directory-integration services, licensing services for professional partners, and supporter contributions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other scam-related conflicts were observed. The Stiftung Gesundheit identity and healthcare-directory purpose remain coherent across the homepage navigation, service descriptions, and legal-page links. External threat screening was clean, while observed interaction produced no cloaking, hidden forms, suspicious scripts, unauthorized external requests, or credential-collection behavior.

- The homepage consistently identifies the service as “Arzt-Auskunft” by Stiftung Gesundheit and presents healthcare search and information functions.
- The homepage contains one doctor-and-location search form; it is not classified as sensitive and has no untrusted submission destination.
- Independent reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no external blacklist finding.
- Traffic telemetry places the domain at rank 494,284, within the global top one million websites.

Regulatory Verification Notes

The website presents itself as a healthcare information and directory service, not as a medical practitioner, financial broker, or regulated investment platform. It does not claim a regulatory licence, and the supplied page evidence does not establish third-party regulated status; neither circumstance conflicts with the stated directory business model. The homepage provides links to an imprint, privacy notice, terms of use, accessibility information, contact material, and information about Stiftung Gesundheit, although the contents of those linked disclosures were not included in the evidence and therefore cannot be assessed in detail.

- The homepage navigation provides dedicated “Impressum,” privacy, terms-of-use, accessibility, contact, and Stiftung Gesundheit pages.
- The homepage distinguishes free directory access from paid premium profiles, certification, professional integrations, and supporter-funded activities.
- The hosting infrastructure is served from AS8220 (COLT Technology Services Group Limited, GB).

- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-09-19.

What to Verify Next

For operational reliance, an organization should reconcile the Stiftung Gesundheit identity and applicable contracting entity against the imprint and contractual documents, confirm that provider listings and appointment information remain current, and review the privacy treatment of location-based searches. Practices or integration partners should additionally validate pricing, data-use rights, service levels, and termination terms before purchasing profiles or licensed directory services.

- The homepage offers a geolocation option for nearby-provider searches, making the privacy notice relevant to location-data handling.
- Provider results may include profile status, opening information, distance, and patient recommendations, all of which warrant currency checks when used for care decisions.
- The site markets both free basic practice entries and paid premium profiles with additional service information.
- Professional offerings include directory implementation in websites, applications, and electronic health-record contexts, creating a need for contractual data-governance review.

Summary Verdict

The site presents as a legitimate, established, and trustworthy healthcare information service with a coherent institutional identity, a clear public-service purpose, clean external reputation, and stable, non-deceptive behavior. Normal interaction, including searches, account login, and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin address operated through identified commercial hosting infrastructure rather than a CDN or WAF edge. Its valid TLS configuration protects data in transit; these are sound technical controls and mitigating factors, although infrastructure alone is not proof of organizational legitimacy.

Closing Assessment

Prospective users may engage normally, while organizations entering paid, integration, or data-sharing arrangements should complete routine contractual and privacy due diligence proportionate to the intended use.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of arzt-auskunft.de.

- The request stayed on arzt-auskunft.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by schlundtech.de, across 4 name servers. NOTED
- It is hosted on COLT, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about arzt-auskunft.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
