

Is asas.my legit? TrustSniffer's high-trust assessment: 96/100

asas.my

Verdict

96

OUT OF 100

HIGH TRUST

asas.my appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Official-looking website for the Association of Shariah Advisors in Islamic Finance Malaysia (ASAS). Provides information about the organisation, membership, certification programs (CSA/CSP), CPD requirements, events, news, contact details and address. Appears organizational and informational rather than a financial investment or transactional scam.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the ASAS Portal for the Association of Shariah Advisors in Islamic Finance Malaysia, presenting organisational information, committee and management details, Certified Shariah Advisor and Certified Shariah Practitioner programmes, membership services, continuing professional development, events, publications, and contact information. Its apparent business model is that of a professional association funded through membership, certification, training, and event-related services rather than investment solicitation or financial trading.

Scam/Impersonation Risk

No contradictions were observed. The homepage and associated organisational pages present a coherent professional-association purpose, with structured information about ASAS, its objectives, committee, certification programmes, membership, CPD, events, and publications. The supplied technical and behavioural evidence also shows no detected phishing, brand-impersonation, malicious-script, hidden-form, wallet-drainer, or sensitive-form indicators. The available reputation checks recorded no malicious or suspicious detections, although coverage was not universal; this supports a low apparent scam risk without independently proving the real-world operator's identity.

EVIDENCE

- Homepage: descriptive content identifies the site as “ASAS PORTAL” and focuses on Shariah advisory professionalism, certification, membership, CPD, and organisational information.
- About Us, Certification, Membership, and Contact pages: the subject matter is internally coherent and consistent with a professional association.
- Site behaviour: 2 successful runs; 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 suspicious inline scripts.
- Domain registration: registered 2012-02-13, approximately 14.53 years old, through Shinjiru Technology Sdn Bhd.

Regulatory Verification Notes

The available material is consistent with an established professional association, but the real-world operator identity is not independently verified. The site describes CSA and CSP certification, membership categories, CPD requirements, and paid registration-related services; the supplied evidence does not establish that these offerings constitute a government or financial-regulatory licence, nor does it provide a verified licence or registration number. That is a regulatory-transparency point for ordinary due diligence, not evidence of fraud. Transport security and hosting telemetry are positive technical signals: the site uses a valid domain-validated certificate and resolved infrastructure associated with DigitalOcean.

EVIDENCE

- About Us, Organisation Structure, Committee, and Management Team pages: identify the association’s stated organisational purpose and governance-related content.
- Certification and Membership pages: describe CSA/CSP programmes, membership categories, fees, CPD, and registration-related services.
- Hosting infrastructure: served from AS14061, DigitalOcean-ASN / DigitalOcean, LLC.
- TLS certificate: issued by YR1, validation level DV, valid to 2026-10-27.

What to Verify Next

Before credential or payment interactions, an organisation seeking formal assurance should independently confirm the association’s legal identity and office details through an authoritative Malaysian source or an independently obtained contact route. The status, scope, and awarding authority of the CSA/CSP programmes should be confirmed directly, together with applicable fee, cancellation, refund, and payment-protection terms. Any account or registration process should be reviewed to ensure that the information requested is proportionate to the stated service.

EVIDENCE

- About Us and Contact pages: provide the identity and location information that should be matched against an independent authoritative record.
- Certification FAQ and Certification pages: identify the programme scope and awarding arrangements requiring confirmation.
- Membership, Registration Form, and fee-related pages: define the transaction terms requiring review before payment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk professional-association website. The site's coherent purpose, mature domain presence, clean observed behaviour, and convergent technical signals support a high-trust posture, while the operator's real-world identity remains independently unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge infrastructure with no origin candidate identified in this analysis. This reduces direct origin exposure and is a mitigating security control, but it is not proof of organisational legitimacy; the underlying hosting provider is DigitalOcean, LLC.

Closing Assessment

Ordinary engagement is proportionate, subject to independent confirmation of the organisation, programme authority, transaction terms, and payment protections before submitting credentials or making payments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of asas.my.

- The request stayed on asas.my. It was not redirected to another domain. CLEAR
- Registration is published under Shinjiru Technology Sdn Bhd. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The registration is paid up to 2027-02-13. NOTED
- The earliest public archive of this site is from 2012-10-22. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [asas.my](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
