

Is aset.com.pe legit? TrustSniffer's high-trust assessment: 100/100

aset.com.pe

Verdict

100

OUT OF 100

HIGH TRUST

aset.com.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

ASET is a Peru-based engineering and consultancy firm offering project management, valuations, and investment advisory with contact information, client testimonials, case studies and a blog. The site appears to be a standard corporate presence to generate leads for paid consulting work.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ASET is a Peru-based engineering and consultancy website presenting project management, valuations and engineering-value services, investment consultancy, experience case studies, client testimonials, and contact facilities for generating professional consulting engagements.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other identity contradiction was observed. A page-level similarity signal associated some content with t.me because of a hyphen-variant pattern, but that signal is not corroborated by the site's actual corporate-consultancy structure, service descriptions, contact form, or linked Facebook and LinkedIn presence. The available evidence therefore supports an apparently legitimate, low-risk corporate website, while not independently proving the real-world operator's identity.

EVIDENCE

- Homepage: identifies ASET and describes more than 20 years of work in investment projects, urban development, real estate, civil works, and infrastructure across Peru.
- Services pages: present project management, valuations and engineering value, and investment consultancy as coherent business offerings.
- Domain provenance: registration continuity indicates a domain age of 6.02 years.
- Archive record: 24 snapshots from 2020-08-12 through 2025-04-16, spanning 6 years tracked.

Regulatory Verification Notes

The site presents a professional-services business rather than a platform claiming a specific financial license. Its investment-consultancy offering makes the scope of any regulated activity worth confirming independently, because the supplied pages do not establish a license authority or license number. This is a disclosure and verification point, not evidence of fraudulent conduct. Administrative registration records identify NIC.PE as registrar and APPRAISALS & CONSULTING CORPORATE S.A.C. as the registrant organization; those records provide context but do not independently verify the operating entity. Available external reputation checks found no confirmed blacklist or malicious-site finding, although reputation coverage was not comprehensive.

EVIDENCE

- Registration record: registrar NIC.PE; registrant organization APPRAISALS & CONSULTING CORPORATE S.A.C.
- Hosting telemetry: served from AS7203, LEASEWEB-USA-SFO – Leaseweb USA, Inc., US.
- Transport encryption: TLS certificate issued by YR2, domain-validated (DV), valid through 2026-11-14T23:46:50+00:00.
- Contact and service pages: provide a corporate telephone number, mobile number, contact form, project-management services, valuation services, and investment consultancy.

What to Verify Next

Before a credential or payment interaction, an interested party should independently confirm the contracting entity, the scope of any investment-related advisory activity, the applicable licensing position, contractual terms, and payment-protection arrangements. References for material engineering or valuation engagements should be obtained through independently sourced channels rather than relying solely on testimonials displayed on the site. Official contact channels should also be confirmed through an independent route before sharing sensitive information.

EVIDENCE

- About and services pages: use the ASET identity and describe investment consultancy, valuations, and engineering services.
- Experience page: presents case studies and client-facing experience claims suitable for independent reference checking.
- Contact page: provides the principal channel for initiating a consulting engagement.
- Homepage: includes client testimonials and an “experience proven” lead-generation message that can be matched against independently obtained references.

Summary Verdict

The site has a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate consultancy website. No contradictory fraud or impersonation signals were identified, but the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site is not shown behind a detected CDN or WAF and resolves to one likely origin IP, with no edge-IP layer identified. This is a direct hosting arrangement rather than a contradiction; the observed infrastructure presents no indicated abuse pattern, while infrastructure alone should not be treated as proof of business identity.

EVIDENCE

- Network resolution: 1 unique IP, 0 edge IPs, and 1 likely origin IP; CDN detected: false.
- Hosting infrastructure: AS7203, LEASEWEB-USA-SFO – Leaseweb USA, Inc., US; server country US.
- Transport security: DV TLS certificate issued by YR2 and valid to 2026-11-14T23:46:50+00:00.

Closing Assessment

Ordinary engagement is proportionate to the high-trust assessment, provided independent merchant-identity, contractual, return-policy, and payment-protection checks are completed before credentials or payments are submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aset.com.pe.

- The request stayed on aset.com.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by multicompserver.net, across 4 name servers. NOTED
- The earliest public archive of this site is from 2020-08-12. CLEAR
- It is hosted on LEASEWEB-USA-SFO, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aset.com.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
