Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at ashfordformula.com.mx presents a minimal corporate information page for Grupo Ashford, offering visitors a downloadable 38 MB corporate presentation and appearing intended for informational rather than transactional use.

Scam/Impersonation Risk

The site presents a simple corporate-facing page and no on-page impersonation, phishing form, or conflicting legal identity was identified. However, this benign presentation is outweighed by confirmed external malicious detections and blacklist status, creating a material risk for sensitive interaction. Separate reports concerning the hosting IP are attributed to shared infrastructure operated by WHG Hosting Services Ltd; that attribution does not establish that every report concerns this specific website, but it remains a relevant adverse signal. The site's real-world operator also remains independently unverified. No third-party broker match was identified.

EVIDENCE

- The homepage is titled “Presentacion Grupo Ashford” and contains only a brief presentation reference with no login, payment, or sensitive-data form.
- External reputation assessment recorded 11 malicious detections and a confirmed blacklist hit for the domain.
- The shared hosting IP, 192.250.227.24, has 912 abuse reports with a confidence score of 100; the reports are attributed to shared provider infrastructure.
- The domain was registered on 2006-08-02 and is approximately 20.07 years old; archival records contain 246 snapshots spanning 2013–2026 across 14 tracked years.

Regulatory Verification Notes

The available site material identifies the presentation with the Grupo Ashford name but does not disclose a license, registration number, or independently verifiable regulatory authorization. This is a transparency and verification gap rather than, by itself, proof of misconduct; in the present case, it must nevertheless be considered alongside the adverse external threat findings. The site's transport encryption is valid but provides domain-control assurance only, not proof of corporate identity or regulatory standing.

EVIDENCE

- The homepage provides a corporate presentation reference but no license number or licensing authority.
- The site is hosted on AS36454, WHG-DAL - WHG Hosting Services Ltd, GB.
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-02 08:44:12 UTC.

What to Verify Next

Before any sensitive interaction, an independent corporate-registry check should confirm that Grupo Ashford is connected to the domain and to a clearly identified legal entity. Any claimed authorization or regulated activity should be checked directly with the relevant official registry, using contact details obtained independently rather than from the site. The downloadable presentation should be handled as untrusted content and scanned before opening, and any necessary engagement should remain limited to passive review until those checks are complete.

EVIDENCE

- The homepage contains no form, login mechanism, payment workflow, or external submission destination.
- Behavioral testing recorded 0 external XHR requests, 0 external POST requests, and 0 hidden forms across 2 successful runs.
- The page contains approximately 96 characters of visible DOM text and no substantive legal, licensing, or contact-information section.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site's informational appearance and stable technical behavior do not overcome the convergence of confirmed external threat detections, blacklist status, and unresolved independent identity verification.

Infrastructure Integrity

The site is served directly from WHG-DAL - WHG Hosting Services Ltd in Great Britain, with no detected CDN or WAF provider and one likely origin IP. This infrastructure configuration offers no meaningful protective mitigation against the adverse reputation findings and should not be treated as evidence of legitimacy.

Closing Assessment

Sensitive use should not proceed; any unavoidable review should remain passive and be preceded by independent confirmation of the operator, authorization, and file safety.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ashfordformula.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
