

# Is ashleygood.com safe? TrustSniffer's low-trust assessment: 40/100

ashleygood.com

## Verdict

40

OUT OF 100

LOW TRUST

ashleygood.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for a personal coach (Ashley Good) offering coaching, mentoring and mediation. Contains services, testimonials, contact details, and a newsletter signup. No login or payment collection forms visible on the captured page.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## At a glance

## The page as captured

<https://ashleygood.com/>

What ashleygood.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

This website is a personal coaching and services site presented under the name Ashley Good, offering coaching, mentoring, and mediation for high-achieving clients, with supporting testimonials, contact functionality, and newsletter registration.

### Scam/Impersonation Risk

A material contradiction is present because external reputation screening records a confirmed blacklist hit. This conflicts with the otherwise benign page presentation, which contains no visible login form, password collection, wallet connection, payment form, hidden form, or detected brand-impersonation pattern. Behavioural inspection nevertheless identified suspicious inline scripts and suspicious network-related signals, so the clean appearance of the homepage should not be treated as sufficient to clear the external warning. No separate identity contradiction or confirmed phishing pattern was observed. The domain's published contact address, [info@ashleygood.come](mailto:info@ashleygood.come), is a contact-channel integrity anomaly because the malformed top-level domain could cause delivery failure or represent a possible typosquat.

#### EVIDENCE

- External screening recorded 1 malicious and 1 suspicious detection, together with a confirmed blacklist hit for the domain.
- The homepage contains no login form, hidden form, password-external submission, wallet connection, or clipboard-hijacking behaviour.
- Behavioural testing recorded 2 suspicious inline scripts, 3 console errors, and a suspicious-network interpretation across 2 successful runs.
- Historical records identify the domain from 2013-04-04 through 2024-07-17, representing 12 years tracked.

### Regulatory Verification Notes

The available page content presents a coherent personal-brand identity and links to Facebook and Instagram, but the real-world operator is only assessed as likely rather than independently verified. The captured content does not state a professional license, registration number, or regulated status. For a coaching, mentoring, and mediation business this is a disclosure and verification gap rather than, by itself, evidence of fraud. The domain registration is longstanding and uses GoDaddy.com, LLC, while the site's transport encryption is valid but domain-validated only.

#### EVIDENCE

- The homepage title and visible content identify Ashley Good and present links to Facebook and Instagram.
- The captured homepage content does not disclose a license authority or license number.
- Registered 2012-10-29; domain age 13.81 years; registrar: GoDaddy.com, LLC.
- TLS certificate issued by YR2 using DV validation, valid to 2026-11-02.

### What to Verify Next

Before any paid engagement, independently confirm the operator's legal name, business registration where applicable, service terms, cancellation and refund arrangements, and the identity of the person receiving payment. Any claimed professional accreditation or regulated activity should be checked directly against the relevant official register. Contact details should be confirmed through an independent channel, and payment should use a method offering appropriate dispute and recovery protections.

#### EVIDENCE

- The Services page is the appropriate source for confirming the exact scope, pricing basis, and delivery terms of engagements.
- The Contact page should be checked for consistent business details and independently validated contact channels.
- The homepage and Praise page should be compared with external professional or business records before relying on testimonials as identity evidence.

## Summary Verdict

The site presents an apparently coherent personal-services operation, but the confirmed external blacklist signal and associated behavioural anomalies produce a low-trust posture. The available evidence does not establish that the named operator is fraudulent, yet it is insufficient to support sensitive interaction or financial reliance.

## Infrastructure Integrity

The site resolves to Google Cloud infrastructure in the United States, specifically AS15169, with no CDN or WAF detected. This provides ordinary hosting context but does not establish legitimacy; the valid TLS certificate protects transport confidentiality only and cannot offset the external reputation contradiction.

EVIDENCE

- Served from AS15169 (Google LLC, Google Cloud), United States; resolved IP: 35.213.240.236.
- Infrastructure resolution identified 1 unique IP, with 0 edge IPs and 0 likely origin candidates.
- TLS certificate validation level: DV; issuer: YR2; expiry: 2026-11-02T23:41:14+00:00.

## Closing Assessment

The appropriate posture is passive review only until the operator, service terms, and payment arrangements have been independently confirmed; credentials and financial information should not be submitted while the external warning remains unresolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF\_WHOIS\_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF\_WHOIS\_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct\_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV\_SUSPICIOUS\_INLINE\_SCRIPTS

## Identity verification

|        |        |
|--------|--------|
| Status | LIKELY |
|--------|--------|

|                                  |        |
|----------------------------------|--------|
| Identity score                   | 76/100 |
| Identity verification confidence | 38%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of ashleygood.com.

- The request stayed on ashleygood.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by siteground.net, across 2 name servers. NOTED
- The registration is paid up to 2026-10-29. NOTED
- The earliest public archive of this site is from 2013-04-04. CLEAR
- It is hosted on GOOGLE, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about ashleygood.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
