

Is asiansolaroptions.com legit? TrustSniffer's high-trust assessment: 93/100

asiansolaroptions.com

Verdict

93
OUT OF 100

HIGH TRUST

asiansolaroptions.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be	Corporate website for Asian Solar Options Corp. (ASOC) showcasing large-scale solar projects, development pipeline (MW/GW figures), services (development, construction, financing, operations), investor information, and contact details for offices in the Philippines and the USA.
------------------------------	--

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

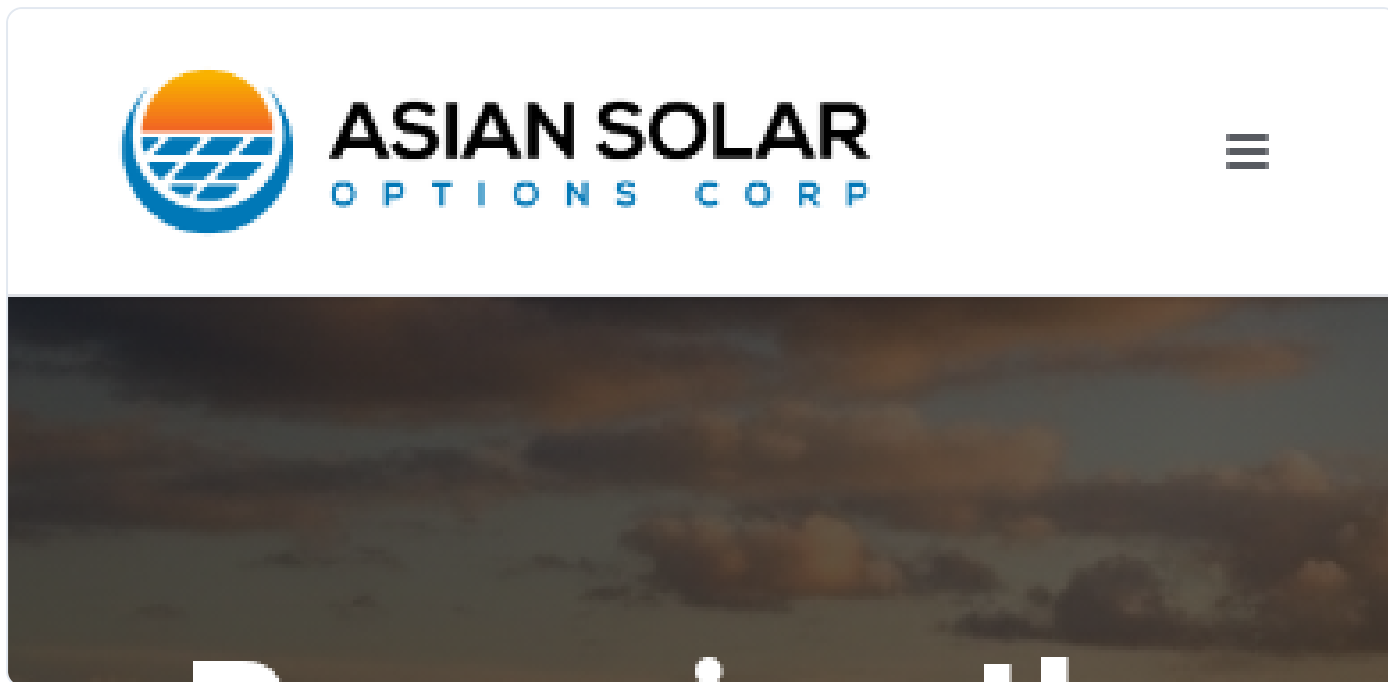

At a glance

The page as captured

<https://asiansolaroptions.com/>

What asiansolaroptions.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Asian Solar Options Corp. (ASOC) presents itself as a Philippines-focused renewable-energy company that develops, constructs, finances, and operates utility-scale solar farms and rooftop solar solutions for commercial and industrial customers, with investor-facing project and sustainability information.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or conflicting-identity contradiction was observed. The homepage presents a coherent corporate business model, project portfolio, investor orientation, and commercial contact structure; captured behavior showed no login form, credential-harvesting mechanism, wallet interaction, or suspicious external submission. An external abuse-report signal is attributed to shared delivery infrastructure, is whitelisted with zero confidence, and is therefore not evidence of site-specific malicious activity. The available evidence is consistent with an established, apparently legitimate corporate website, although the real-world operator identity is not independently verified.

EVIDENCE

- Homepage: corporate presentation for ASOC, including solar development, construction, financing, operations, projects, sustainability, compliance, investors, and contact navigation.
- Captured site behavior: 2 successful runs; 0 external XHR/fetch requests, 0 hidden forms, 0 password-external forms, and 0 wallet-provider or wallet-drainer detections.
- Technical reputation artifact: 81 reports associated with IP 199.36.158.100; the address is identified as shared infrastructure, whitelisted, and assigned a confidence score of 0.
- Registration record: registered 2021-10-06T10:27:26Z and 4.88 years old.

Regulatory Verification Notes

The site offers corporate, investor, sustainability, compliance, and contact content, but the supplied evidence does not show a claimed license, license number, or independently verified regulatory authorization. This is a verification and disclosure matter rather than evidence of a scam. The public registration record uses GoDaddy.com, LLC, with registration details provided through Domains By Proxy, LLC; this is an administrative registration arrangement and does not independently establish the operator's legal identity. A separate broker-reputation dataset returned no match, which is contextual support only and not a licensing conclusion.

EVIDENCE

- Registration artifact: registrar GoDaddy.com, LLC; creation date 2021-10-06T10:27:26Z; expiration date 2026-10-06T10:27:26Z.
- Archive record: 0 snapshots; first seen 2021-11-26T12:00:53Z; last seen 2026-06-30T06:26:35Z; 6 years tracked.
- Hosting artifact: served from AS54113, FASTLY - Fastly, Inc., US.
- Transport encryption: TLS certificate issued by WR3 at DV validation level, valid to 2026-10-22T13:22:05+00:00.

What to Verify Next

Before credential or payment interactions, an independent party should confirm the operating entity through relevant Philippine and, where applicable, US corporate and energy-sector registries. Commercial counterparties should also validate the named project entities, contractual authority, offtake arrangements, payment instructions, and applicable payment-protection terms through independently sourced contact channels rather than relying solely on information supplied by the website.

EVIDENCE

- The site includes About, Investors, Sustainability, Compliance, Careers, and Contact pathways suitable for cross-checking corporate and project representations.
- The business model is commercial and investor-facing, making independent confirmation of the contracting entity and project documentation material before funds or sensitive information are exchanged.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** consistent with an established, apparently legitimate corporate website. No scam, phishing, impersonation, or identity contradictions were observed. The principal qualification is that the site's connection to a specific real-world operator remains independently unverified, so legitimacy should be regarded as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by Fastly CDN/WAF infrastructure, and the observed address is a CDN edge address rather than an exposed origin candidate. This reduces direct origin exposure and is a positive defensive signal, but protective hosting infrastructure alone does not prove corporate legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; sensitive credentials, contractual commitments, and payments should follow the independent identity, counterparty, and payment-protection checks outlined above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 81 reports on hosting IP 199.36.158.100 (Google LLC, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of asiansolaroptions.com.

- The request stayed on asiansolaroptions.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-06. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about asiansolaroptions.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
