

Is asmmpanel.com safe? TrustSniffer's low-trust assessment: 25/100

asmmpanel.com

Verdict

25

OUT OF 100

LOW TRUST

asmmpanel.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Commercial SMM panel targeting Bangladeshi customers offering purchasable social-media engagement (followers, likes, views, subscribers) across multiple platforms. Includes pricing and order CTAs, local payment options (bkash, nagad), and strong safety/quality claims but lacks verifiable evidence of legitimate delivery mechanisms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Bangladesh-focused commercial social-media marketing panel that presents paid account-growth services, pricing, order controls, local payment options, and user registration features for customers seeking to increase online engagement.

Scam/Impersonation Risk

No direct phishing, impersonation, or other identity-contradiction signals were observed. The principal concern is the business model itself: the homepage and service catalogue offer purchasable followers, likes, views, subscribers, watch time, comments, saves, and channel or group growth, while describing delivery as “real,” “quality,” or “non-drop” without presenting independently verifiable delivery evidence or third-party audits. Customers are required to pay before service delivery through local mobile-payment options, creating an opaque value flow in which the promised outcome is difficult to validate or recover if not delivered. Promotional claims such as “100 percent safe and secure,” “#1 Rated in Bangladesh,” “4.7/5,” “4,020,178 Order completed,” and “81,006+ Happy Clients” are displayed without supporting provenance. This supports a cautious, verify-before-proceeding posture, but does not establish impersonation or a confirmed scam.

EVIDENCE

- The homepage advertises followers, likes, views, subscribers, comments, saves, and watch-time services across Instagram, Facebook, YouTube, TikTok, and Telegram, with order calls to action and payment-before-delivery mechanics.
- The homepage makes strong safety and performance claims while providing no verifiable delivery mechanism, audit, or independent evidence for the advertised engagement.
- Registration records identify a creation date of 2021-07-04T08:41:05Z and an age of 5.13 years; the registrar is NameCheap, Inc.

Regulatory Verification Notes

The supplied legal and identity content does not clearly establish the operating entity, responsible company, or applicable authorization framework. No license or license number is claimed in the available business information. Because the service involves paid commercial activity and promises measurable marketing outcomes, the absence of clear entity and authorization disclosures is a material verification gap rather than proof of fraud. The available evidence supports an unverified operator identity and a low overall trust posture. A third-party broker-data check produced no matching result, which is only contextual and does not constitute legal or regulatory validation.

EVIDENCE

- The available About, Contact, and business-information content does not clearly identify a responsible legal entity or regulatory basis for operation.
- The site's hosting telemetry records AS153523, UHB-AS-AP - Ummah Host BD, BD.
- The site uses a valid DV TLS certificate issued by YR2, expiring 2026-10-29T19:57:42+00:00.

What to Verify Next

Before any account creation or payment, the operator's legal name, business registration, refund terms, service-delivery standards, and complaint process should be obtained from the site and checked against authoritative Bangladeshi business or consumer-protection records. The advertised engagement should be tested only with a minimal, non-sensitive transaction after confirming whether the relevant social platforms permit the service and whether the supplier provides enforceable refund or replacement terms. Contact channels should be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The About and Contact pages are the relevant locations for confirming the operator's legal identity, address, refund process, and escalation route.
- The Services and pricing pages should be checked for measurable delivery definitions, replacement conditions, retention periods, and limitations.
- The Sign Up, Sign In, and order/checkout functions establish that the site supports user accounts and paid transactions, increasing the importance of independent verification before use.

Summary Verdict

The website has a **low-trust posture** with unverified operator identity and material governance concerns surrounding its paid service model. No direct impersonation or phishing contradiction was identified, but the available evidence is insufficient to support sensitive interaction, credential submission, or financial engagement without independent validation.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge addresses rather than an independently observed origin. This reduces direct exposure of the origin infrastructure and is a mitigating technical control, but it does not establish the legitimacy of the operator or the quality of the services offered.

Closing Assessment

The appropriate course is to limit activity to non-sensitive inspection until the operator, transaction protections, and service claims have been independently validated; account login and payment should remain deferred pending those checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of asmmpanel.com.

- The request stayed on asmmpanel.com. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-04. NOTED
- The earliest public archive of this site is from 2021-07-09. CLEAR
- It is hosted on UHB-AS-AP, from a server in BD. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about asmmpanel.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
