

Is asnbank.nl legit? TrustSniffer's high-trust assessment: 100/100

asnbank.nl

Verdict

100

OUT OF 100

HIGH TRUST

asnbank.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking ASN Bank website in Dutch describing products (payments, savings, investing, mortgages, insurance, pensions), branch information, and customer services. Promotes sustainable banking and links to app stores and social channels.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Dutch-language public site for ASN Bank, presenting retail banking and financial services including payments, savings, investments, mortgages, insurance, pensions, lending, branch information, and customer support, with an emphasis on sustainable banking and access through digital and social channels.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate-bank profile, and the available technical and external reputation signals show no malicious, phishing, impersonation, or suspicious-content findings. The domain is long-established and registered through Registrar.eu, which supports continuity of the website's apparent identity, although the real-world operator is not independently verified by this assessment.

EVIDENCE

- Domain registration record: registered 1997-05-20 at 13:03:04 UTC; age 29.24 years.
- External reputation assessment recorded 0 malicious detections, 0 suspicious detections, and no malicious search-browsing warning.
- The homepage identifies the site as ASN Bank and was classified as a corporate banking website, with no brand-impersonation indicators detected.

Regulatory Verification Notes

The site's apparent business model is conventional retail banking, covering deposit accounts, loans, mortgages, investments, insurance, and pension services rather than speculative or abuse-prone offerings. The available content does not identify a license authority or license number, so regulatory status should be confirmed independently; this is a disclosure and verification gap, not evidence of a scam. The site's established presentation, clean external reputation, strong global traffic footprint, and high-assurance transport certificate are consistent with an established website, while they do not independently prove the legal identity of the operator.

EVIDENCE

- Homepage content lists ASN Bank products for payments, savings, investing, mortgages, insurance, lending, and pensions, together with customer-service functions.
- The site's transport encryption uses an EV certificate issued by DigiCert EV RSA CA G2 for ASN Bank N.V., valid through 2027-02-10.
- The homepage links to Facebook, YouTube, Instagram, and LinkedIn, providing four observed social-channel references.
- The available business-content assessment records no license claim, licensing authority, or license number.

What to Verify Next

Before credential or payment interactions, an institution-specific registry check should confirm the applicable banking authorization and the legal entity responsible for the service. The published terms, privacy information, complaints process, and customer-support channels should be compared with independently obtained institutional records, and payment-protection arrangements should be confirmed through an established, offline contact route rather than relying solely on on-site links.

EVIDENCE

- The available disclosure assessment marks the on-page regulatory disclosure state as unclear.
- The site contains one login form, with no detected untrusted destination or external sensitive-form submission.
- The assessment identified no suspicious scripts, hidden forms, wallet activity, cloaking, or external posting behavior.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, but the website's real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers and no origin candidate identified in the analysis. This reduces direct exposure of the underlying service infrastructure and is a mitigating technical control, not independent proof of legitimacy.

EVIDENCE

- Served from AS20940, AKAMAI-ASN1 - Akamai International B.V., NL.
- Observed edge IP addresses were 2.17.100.201 and 2.17.100.225, both associated with AS20940.
- Hosting country recorded for the infrastructure is NL.

Closing Assessment

Normal browsing and ordinary banking interaction are proportionate to the available risk assessment, provided independent checks of institutional identity, applicable service terms, and payment protections are completed before submitting credentials or initiating financial transactions.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of asnbank.nl.

- The request stayed on asnbank.nl. It was not redirected to another domain. CLEAR
- Registration is published under Registrar.eu. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED
- It is hosted on AKAMAI-ASN1, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about asnbank.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
